RI TRANSPARENCY REPORT

2013/14

ASR Nederland N.V.

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. While this information is believed to be reliable, no representations or warranties are made as to its accuracy and no responsibility or liability can be accepted for any error or omission.

"ASR Nederland N.V. wants, as insurer, investor and employer, to play a leading role in the Corporate Social Responsibility (CSR) for the financial sector."

Our mission

Our mission is to provide people with security in uncertain situations. We do that by providing people financial continuity and enabling them to take well-considered risks in achieving their ambitions. In that, insurance is essential and insuring our reason for existence. For a.s.r., valuable service starts by understanding what people value. We believe that customers are able to insure themselves in ways best fitting their situation, preferences and possibilities. a.s.r. stands for helping customers. a.s.r. wants to be a useful insurer, that is a welcome part of the community. Intelligibility and simplicity combined with efficient operations and a solid financial position are essential. Customers should be convinced that their risks are covered by an insurer with austere operations and that avoids wastage. That listens to them, thinks along with them, and can be reached via several forms of communication.

Our vision

a.s.r. is going back to basics and redefining insuring. Our predecessors put insurance in the Netherlands as a service on the map. That history goes back to 1720, with as a foundation sharing risks. That is exactly how it should be today. Taking society and the environment into account is front and center in our vision. The a.s.r. core values, personal, approachable and accountable and true to who we are, play a crucial role.

At a.s.r. every employee is responsible for making the wishes of customers a reality. Winning back the customers' trust key in this sense. But trust is also earned in other ways. As an insurer, by successfully working together with distribution partners. As an employer, by offering employees an inspirational and challenging work environment. And by offering the shareholder the prospect of an attractive return.

We are convinced that our existence is justified by keeping customer interests and customer experiences in mind. Our products should fit this mindset.

Our Socially Responsible Investments Policy

ASR Nederland's responsible investment policy focuses on positive selection for best practices and best products based on ESG-criteria. This means that ASR Nederland invests more in companies that perform well in their sector or contribute towards sustainable development (eg. waste processing, recycling and clean energy). ASR also maintains an exclusion list based on multiple criteria and practices engagement/ SRI dialogue with the companies in which it has investment positions.

Since 2011 ASR has also signed the United Nations Principles of Responsible Investment (UNPRI) and the United Nations Global Compact (UN GC). Furthermore, ASR Nederland's CIO is the Chairman from the Investments Policy Committee at the Dutch Association of Insurers (Verbond van Verzekeraars). Under his coordination, the Verbond van Verzekeraars has agreed an industry-wide Sustainable Investments Code, which came into force on January 1st, 2012. ASR Nederland has been compliant with the Code already before the start. In 2013, ASR signed the UNEP FI Principles for Sustainable Insurers.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

There is a distinction between investments, whether internal or external, where a.s.r. has the capability to influence the guidelines of the investment portfolio, and the investments in funds or other vehicles from external providers, where a.s.r. does not have this capability.

In the first case, possibility to directly influence the investment portfolio or guidelines, we have defined an SRI policy for investment in Companies. This policy is publicly available at <https://www.asr.nl/over-asr/Verantwoord-Ondernemen/Paginas/verantwoord-vermogensbeheer.aspx>. We apply here a Manager Screening and Integration strategy.

In the second case, a.s.r. requests to its External Providers a maximum effort to be signatory of the UN PRI and the UN Global Compact. For those asset managers who are not signatory (e.g. smaller boutiques without the internal capabilities to comply with the recurrent requests from both sets of Principles), a.s.r. will discuss the internal SRI practices and set of conduct from the provider and make their own assessment. We apply here a Manager Screening strategy.

Exclusion of Armament is always a minimum requirement.

(A) Implementation: Screening

LEI 06

Mandatory

Descriptive

PRI 1

LEI 06.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Investment decisions of a.s.r. for equities and credits include the company's score on ESG criteria (Environmental, Social and Governance) and an assessment of controversial activities. In this way we avoid non-financial risk, especially reputational risk, and comply with legislation, UN PRI, UN Global Compact and the 'Code Duurzaam Beleggen' of the Verbond van Verzekeraars. a.s.r. SRI guidelines follow the standards as defined by Forum Ethibel and the SRI research is provided by Vigeo.

1. Selection of companies by their relative ESG score.

We favor companies excelling on ESG policy and implementation, these are classified as pioneering, best-in-class and sustainable companies. This classification applies a relative, sector wise ranking for six domains of analysis:

- Environment
- Human Resources
- Human Rights
- Community Involvement
- Business Behaviour
- Corporate Governance.

Additionally we have defined specific guidelines for the relative ranking of companies involved in the following activities:

- Animal maltreatment
- Sex industry
- GMO's in food and feeds
- Hazardous Chemicals
- Alcohol

2. Controversial activities that can trigger an engagement process or the exclusion of a company:

As an institutional investor we can influence companies through engagement, rather than by excluding them from our investment portfolio. When we cannot achieve enough improvement in a constructive dialogue, we can exclude a company from our investment portfolio. The engagement and exclusion process is based on the following controversial activities:

- Complicity in systematic and/or gross violation of Human Rights
- Complicity in systematic and/or gross violation of Labour Rights
- Armament
- Nuclear Energy
- Gambling
- Tobacco

We always exclude companies that are engaged in the production or trade of controversial weapons. For all other criteria, we may use the instrument of engagement or we may exclude a company from our investment portfolio.

LEI 06.2

Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

a.s.r. is committed to ensuring that it makes investment decisions responsibly and with integrity.

This Policy for Socially Responsible Investment (SRI) has been developed to allow a.s.r. to pursue a responsible and sustainable approach, whilst minimising any negative impact on its investment returns.

The a.s.r. SRI Policy has been extended over time to capture the progress of the market and changes in the society.

The first comprehensive SRI policy was agreed at a.s.r. Board level (previously Fortis Insurance Nederland) in 2007. This SRI policy describes the commitment of a.s.r. to exclude certain 'non-sustainable' practices from our portfolio and to focus on the 'best-in-class' investments per industry/sector. It also describes the modus operandi for the implementation of the policy. The objective is to have a full compliant portfolio, which is screened on a semi-annual basis by an external Research and Screening SRI Agency, Vigeo, and accredited by the certification of Forum Ethibel.

In 2010, the SRI criteria were slightly amended following the criteria from Forum Ethibel, and utilise their Excellence Register to identify the 'best-in-class' investments. In addition, a.s.r. expanded the semi-annual screening to include the constituents of the benchmarks used. This way, we are aware of the issues with non-sustainable companies in the first place, and we can decide on the most appropriate way to proceed whether not to invest in the company or get involved in 'engagement to influence'.

The SRI policy is approved by the Board of Directors of a.s.r. Any interpretations or exceptions on the policy as well as the decision to invest, engage or exclude a company are taken by the a.s.r. (Centraal) Beleggingscomité.

Indicate which processes your organisation uses to ensure that screening is based on robust analysis.

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out

FI 04.2

Describe your primary reasons for choosing a particular incorporation strategy.

a.s.r. Fixed Income portfolio is either internally managed or via a segregated mandate with an external manager. In both cases, a.s.r. has the capability to influence the guidelines of the investment portfolio and ensure full alignment in the screening and integration of the SRI criteria in the investment portfolio.

(A) Implementation: Screening

FI 06	Mandatory	Descriptive	PRI 1
-------	-----------	-------------	-------

FI 06.1 Indicate and describe the type of screening you apply to your internally managed active corporate fixed income investments.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Investment decisions of a.s.r. for equities and credits include the company's score on ESG criteria (Environmental, Social and Governance) and an assessment of controversial activities. In this way we avoid non-financial risk, especially reputational risk, and comply with legislation, UN PRI, UN Global Compact and the 'Code Duurzaam Beleggen' of the Verbond van Verzekeraars. a.s.r. SRI guidelines follow the standards as defined by Forum Ethibel and the SRI research is provided by Vigeo.

1. Selection of companies by their relative ESG score.

We favor companies excelling on ESG policy and implementation, these are classified as pioneering, best-in-class and sustainable companies. This classification applies a relative, sector wise ranking for six domains of analysis:

Environment
 Human Resources
 Human Rights
 Community Involvement
 Business Behaviour
 Corporate Governance.

Additionally we have defined specific guidelines for the relative ranking of companies involved in the following activities:

Animal maltreatment
 Sex industry
 GMO's in food and feeds
 Hazardous Chemicals
 Alcohol

2. Controversial activities that can trigger an engagement process or the exclusion of the company:

As an institutional investor we can influence companies through engagement, rather than by excluding them from our investment portfolio. When we cannot achieve enough improvement in a constructive dialogue, we can exclude a company from our investment portfolio. The engagement and exclusion process is based on the following controversial activities:

Complicity in systematic and/or gross violation of Human Rights
 Complicity in systematic and/or gross violation of Labour Rights
 Armament
 Nuclear Energy
 Gambling
 Tobacco

We always exclude companies that are engaged in the production or trade of controversial weapons. For all other criteria, we may use the instrument of engagement or we may exclude a company from our investment portfolio.

Additional information. [Optional]

ASR Nederland has agreed its SRI policy criteria at corporate level.

This policy is implemented on constant basis to the Internally managed Fixed Income - Government portfolio.

a.s.r. SRI policy regarding Governments is based on 2 international indicators:

1. Exclusion of countries considered lacking basic political freedoms and civil rights.

Indicator: "Freedom in the World" published by the Freedom House. Countries are classified as "Free", "Partly Free" and "Not Free".

Exclusion level: Countries classified "Not Free" by Freedom House.

2. Exclusion of countries considered highly corrupt.

Indicator: Corruption Perception Index published by Transparency International. The Corruption Perception Index (CPI) by Transparency International (TI) ranks countries from 100 (very little corruption) to 0 (very high corruption).

Exclusion level: Countries with a CPI of less than 30.

The SRI screening outcome is consistently included in financial analysis, investment and divestment decisions.
