RI TRANSPARENCY REPORT

2013/14

AXA Investment Managers

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

AXA IM is covered by the scope of AXA Group's Global Responsible Investment Policy. The policy is defined as the "integration of environmental, social and corporate governance (ESG) considerations in (AXA's) our investment processes and (our) ownership practices. AXA believes that ESG factors have the potential to impact investment portfolios across companies, sectors, regions and asset classes over time." In addition, AXA IM as an investor with a widely diversified portfolio and long-term horizon, can best enhance investment performance and reduce unwanted risk exposures by focusing both investment and portfolio monitoring activities on generating of sustainable shareholder value at portfolio companies. We consider this to be part of the fiduciary duty for a fund manager like AXA IM with a large size and diversified exposure. This policy provides the foundation for AXA IM's proxy voting and company engagement activities, as well as for participation in related public policy discussions.

Our investments are evaluated with regard to ESG through the RI Search© platform. This web platform provides portfolio managers with ESG ratings for individual securities and for portfolios versus their benchmarks. They also have access to ESG scores of companies as well as the carbon intensity of companies expressed in CO2e Tons/Mns \$ revenue.

RI Search© has enabled AXA IM to develop 'ESG Impact', a succinct, high-value report of a portfolio's ESG integration that brings together quantitative, qualitative data and voting analysis. Concretely, 'ESG Impact' helps fund managers to monitor the ESG ranking of portfolio holdings, review the top ESG risks and assess the most meaningful Key Performance Indicators such as carbon and water footprint as well as the independence and gender balance of Boards. Finally, our monitoring role also ensures the consistency of voting and engagement policies.

AXA Investment Managers plays an active role in promoting acceptance and implementation of ESG issues within the investment industry. During 2013 we devoted significant resources to assisting our insurance clients to integrate ESG issues into their day-to-day activities, through demonstrations of our RI Research Tool (10 clients were reached). We continue to provide tailored training programmes for clients on ESG issues. We sponsor academic research to explore the linkage between ESG factors and long term company performance as we believe that it is necessary to build a foundation of empirical evidence to support acceptance of ESG consideration within the industry. In addition, AXA IM published research papers on responsible investment (Future-proofing Company Leadership: Board Diversity in EURO STXX 50 Companies, Sovereign Debt Investing: ESG Framework and Applications, 2012). We also participate in seminars and other public forums where ESG issues are discussed.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

In line with AXA's Group objective to align investments with AXA's corporate responsibility agenda and AXA's IM belief that responsibility is a key driver of value-creation, we have chosen to enhance the integration strategy across the listed equity investments. This approach is completed by thematic and screening strategies, which help AXA IM to best fit client needs and objectives. We monitor systematically strong ESG risks (controversial weapons, palm oil, soft commodities ...) for all AXA Group assets under management.

LEI 03.3

If assets are managed using a combination of ESG incorporation strategies, describe briefly how these are used in combination. [Optional]

Our thematic and screening strategies are mainly completed by a fundamental approach. Tobacco and Defence sectors are systematically excluded from SRI mutual funds.

LEI 06

Mandatory

Descriptive

PRI 1

LEI 06.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Since 2008, AXA IM excludes from its investments, those companies involved in the production of anti-personnel landmines as well as cluster bombs. Since 2011, this exclusion has been extended to include those companies involved in depleted uranium weapons. This included all mutual funds managed by AXA IM on behalf of its distribution clients, with the exception of index funds. The definition of the exclusion list of companies is based on the treaty of Ottawa for the Anti-personnel Landmines, the treaty of Oslo for cluster bombs and is updated by the RI team once per year. The global exclusion list covers public and private equities and their issuers (public and private).

In addition, Tobacco and Defence sectors are systematically excluded from SRI mutual funds. We excludes from SRI funds strong controversies (5 on a scale from 0 to 5) if the internal research confirms the negative opinion on the stock or issuer.

Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

We have developed an ESG framework relying on the inputs from several extra-financial agencies and internal ESG convictions. This framework is composed of circa 15 criteria across E, S and G dimensions, the overall ESG assessment being a weighted average of E, S and G taken separately, where the weights depend on the sector of the company

In the end, we invest in companies that have historically performed better than their peers within a particular industry or sector on environmental, social and corporate governance (ESG) issues. These factors are systematically taken into consideration in the selection of the investment and therefore have an impact on the eligible universe by eliminating the companies or the countries which deliver bad ESG performance or when they present serious controversial matters.

Norms-based screening

Screened by

- UN Global Compact Principles
- Universal Declaration of Human Rights
- International Labour Organization Conventions
- United Nations Convention Against Corruption
- OECD Guidelines for Multinational Enterprises
- Other, specify

Description

We follow the extent to which companies respect the principles of the Global Compact, including aspects such as labour and human rights. Norms-based exclusions are done on a case-by-case basis following our analysis of news alerts by external providers and our internal RI analysts. When we detect a breach of human rights, an alert is sent to fund managers. A sell recommendation is attached if we believe companies do not respect fundamental rights in terms of Social, Environmental and ethical behaviour.

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
-----------------	---

Criteria are established according to an internal methodology with our external provider and internal conviction. The Best in Class universe is reviewed twice a year. The ESG criteria are reviewed according to our internal conviction. We inform clients either through the Transparency code or through monthly or bi-annual committees.

LEI 07.1	Indicate which processes your organisation uses to ensure that screening is based on robust analysis.
-----------------	---

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out

(C) Implementation: Integration of ESG issues

LEI 10	Voluntary	Descriptive	PRI 1
---------------	-----------	-------------	--------------

LEI 10.1	Describe how you integrate ESG factors into investment decision making processes.
-----------------	---

AXA IM integrates ESG factors into investment decisions making processes through various approaches:

RI Search platform: To assist in mainstreaming (integrate ESG factors), the AXA IM RI team launched its RI tool 'RI Search' in 2007. This tool provides access to a wide range of extra-financial data and analysis on environmental, social and governance 'ESG' factors across asset classes and thus enables its portfolio managers to incorporate ESG criteria into their investment decisions. The range of functionalities on RI-Search include investment universe screening, ESG portfolio footprints, carbon data calculations, sector screening, as well as company specific ratings, research and analysis.

Company reports: Our fundamental analyst team produce detailed reviews looking at the ESG issues impacting investee companies and this reports are shared with our fund managers and analysts by email and also stored on RI Search which is accessible by all our investment teams

Investment team meetings: The RI team participates in the investment team meetings where we share our particular insights into ESG issues impacting on investee companies.

Engagement: AXA IM approach is for an integrated engagement approach with the full participation of relevant fund managers and analysts in setting up the particular engagement strategy and the follow-up meetings with companies. For example, we are conducting a coordinated engagement programme which focuses on ESG risk issues which are impacting on company valuation for targeted companies. The target companies were jointly identified by the Investment and RI teams and the follow-up engagement is coordinated and attended by representatives of both teams.

ESG Impact: ESG ex-post analysis of portfolios is conducted with the aim of identifying the main ESG risks in top holding positions. In addition, ESG key criteria are calculated by portfolio in order to assess the ESG performance provided by the sector and stock allocation.

Training: The RI team organises ongoing training on ESG issues to AXA IM staff. These sessions cover the team's activity (research methodology, proxy voting, etc.); emerging ESG issues and the ESG initiatives in which AXA IM participates. In addition, each investment platform receives formal training on the features and functions of the RI Search tool.

Engagement

Overview

LEA 01	Voluntary	Descriptive	PRI 2
LEA 01.1	Provide a brief overview of your organisation's approach to engagement.		

AXA IM has an active ownership approach whereby we act as stewards of investments made on our clients' behalf. The overarching objective of AXA Investment Managers' engagement programme is to use our clients' investor rights to protect their investments. We aim to engage with companies where the issue of concern may have a material impact on the Company's performance and investor value in the medium to long-term.

In particular, we believe that a proper consideration of relevant Environmental, Social and Governance (ESG) matters will impact on the long-term sustainable performance of companies and benefit investors of such companies.

Conducted by	<input checked="" type="checkbox"/> Individual / Internal <input type="checkbox"/> Collaborative
Objectives	To narrow the valuation discount caused by poor ESG Performance.
Scope and Process	<ol style="list-style-type: none"> 1. Developed a methodology to integrate ESG issues into mainstream fundamental company analysis. 2. --------	-----------	-------------	-------

LEA 16.1	Provide a brief overview of your organisation's approach to (proxy) voting (including the filing and/or co-filing of shareholder resolutions if applicable).
-----------------	--

We believe that voting at company meetings is an important part of the dialogue between a company and its shareholders and a fundamental aspect of our fiduciary duty to our clients. Considered voting is at the core of our corporate governance activity. AXA Investment Managers Corporate Governance & Voting Policy provides a robust framework for the proper governance of companies and guides our voting activities. It is based on principles of good corporate governance which serve to protect the long-term interests of shareholders. In addition to our global policy, we have also developed voting guidelines for specific markets taking account of the fact that practices vary in different jurisdictions and that the companies in which we invest are subject to different local laws and regulations on governance matters.

AXA IM has established a Corporate Governance Committee which guides and oversees the application of the Corporate Governance and Voting Policy. Members include fund managers and senior AXA IM personnel who have a well-established corporate governance profile in their respective markets.

The Responsible Investment team, working under the direction of the Corporate Governance Committee, actively monitors resolutions proposed for shareholder approval at general meetings and exercise voting rights on behalf of clients. When reviewing resolutions proposed at general meetings we judge resolutions against fundamental principles of good corporate governance, while taking account of best practice standards pertinent to the relevant market and the Company's particular circumstances.

We have established a policy to guide our securities lending activities as it relates to vote. Generally, shares will not be lent where the objective of such activities is to vote at general meetings.

In addition, we will recall shares in advance of general meetings in the following circumstances:

- where we wish to register our full voting interests, even if the issues are not deemed to be controversial;
- where we have engaged or are engaging actively with a company;
- where companies are seeking shareholder approval for transformational transactions such as mergers and acquisitions, face hostile actions including takeover bids, where shareholders have requisitioned general meetings or put items on the agenda which we consider to be detrimental to our interests or where we wish to support such items; or
- where the issue at stake represents a serious threat to shareholder rights or interests.

FI 04.2

Describe your primary reasons for choosing a particular incorporation strategy.

In line with AXA's Group objective to align investments with AXA's corporate responsibility agenda and AXA's IM belief that responsibility is a key driver of value-creation, we have chosen to enhance the integration strategy across the listed equity investments. This approach is completed by thematic and screening strategies, which help AXA IM to best fit client needs and objectives. We monitor systematically strong ESG risks (controversial weapons, palm oil, soft commodities ...) for all AXA Group assets under management.

Type of screening

Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Since 2008, AXA IM excludes from its investments, those companies involved in the production of anti-personnel landmines as well as cluster bombs. Since 2011, this exclusion has been extended to include those companies involved in depleted uranium weapons, in palm oil and soft commodities. This included all mutual funds managed by AXA IM on behalf of its distribution clients, with the exception of index funds. The definition of the exclusion list of companies is based on the treaty of Ottawa for the Anti-personnel Landmines, the treaty of Oslo for cluster bombs and is updated by the RI team once per year. The global exclusion list covers public and private equities and their issuers (public and private).

In addition, Tobacco and Defence sectors are systematically excluded from SRI mutual funds. We excludes from SRI funds strong controversies (5 on a scale from 0 to 5) if the internal research confirms the negative opinion on the stock or issuer.

Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Sector:

We have developed an ESG framework relying on the inputs from several extra-financial agencies and internal ESG convictions. This framework is composed of circa 15 criteria across E, S and G dimensions, the overall ESG assessment being a weighted average of E, S and G taken separately, where the weights depend on the sector of the company

In the end, we invest in companies that have historically performed better than their peers within a particular industry or sector on environmental, social and corporate governance (ESG) issues. These factors are systematically taken into consideration in the selection of the investment and therefore have an impact on the eligible universe by eliminating the companies or the countries which deliver bad ESG performance or when they present serious controversial matters.

Country :

For government and quasi-government issuers, we rely on the Environmental, Social and Governance indicators published by recognised international sources.

For the Environment: CO2 emissions, for Social: the UN HDI (Human Development Index), and for Governance: the World Bank indicators. An ESG score is thus calculated, taking into account not only the current level of the indicator but also the way it has developed over a 5 year cycle. The ESG score is complemented by a "political commitment" score which measures the countries' commitment to a number of key international conventions (human rights, labour rights, controversial weapons, the environment).

Norms-based screening

FI 06.2

Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

Criteria are established according to an internal methodology with our external provider and internal conviction. The Best in Class universe is reviewed twice a year. The ESG criteria are reviewed according to our internal conviction. We inform clients either through the Transparency code or through monthly or bi-annual committees.

- External research and data used to identify issuers to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Information on ESG issues and/or ratings is updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct ESG research reviews some or all screening decisions

A dedicated ESG analyst covers countries from a more qualitative view point. This analyst participates to the "Rates" committee where the fund management will define interest rates scenarii on a quarterly basis.

From a portfolio management view point, it is possible for the portfolio manager to get an ESG footprint for its government fixed income portfolio/carve out against its benchmark on a daily basis through the RISearch platform. Using our Active Owner approach to Responsible Investing, our investment process is designed to encourage the emergence of a "Green Value" in real estate. Through an active dialogue with clients, we elaborate the sustainability solutions which best fit their sustainability needs, return requirements and the individual asset.

When investing in existing assets a Green Rating audit may be included in the due diligence process, providing an initial snapshot of how the property performs from a sustainability perspective, together with recommendations to increase the profile - either from an 'intrinsic' (i.e. building level) perspective or from an 'actual' perspective (i.e. inclusive of occupiers' impact). Green Rating is a pan-European audit scheme and has been used to audit assets totalling more than 9.5 million m2 to date in Europe.

Alternatively, appropriate in use certification may be sought.

For development assets, AXA Real Estate applies a strict sustainability policy - encompassing both initial construction and design and use - to all its developed buildings.

To be transparent, investment decisions will be based on a combination of factors including traditional property criteria of location, tenant financial covenant, level of rent, length of lease, et al and not exclusively driven by ESG or sustainability factors.

Post investment activities will be based on continuous monitoring of key data mainly (but not exclusively) on the active management assets of the portfolios.

Within AXA Real Estate, Asset Managers in local teams have dedicated property assets which they will actively manage. ESG factors will form part of that process, as well as forming a key element in the Business or Asset Plan. Each AM is required to make positive recommendations - e.g energy saving initiative, refurbishment. Upgrade of systems, as appropriate.

Ultimate responsibility is with a Fund Manager, who sets the strategy for the relevant fund or mandate, based in regular dialogue with the Asset managers.

The Property Manager will be subject to a specific Asset Management contract tailored to fit the legal requirements of the territory involved and the nature of the investment fund or mandate.

More recently secured mandates are likely to have a higher proportion of ESG matters (e.g a recent pension fund secured in France, where these measures are central to performance management).

In the UK portfolios, the Asset and Property Managers concentrate on measurement of an "energy management portfolio" - a representative sample of the largest multi tenanted assets in the retail shopping centre/park and office sectors which have the biggest material impact on CO2 emissions. In this way resources are focused on assets which have the biggest impact on the environment and are monitored and measured quarterly.

Additional information. [Optional]

AXA Real Estate is an active developer of real estate assets - either in its specific Development Fund but also an option for acquisition (either of sites or forward funding) or as a strategic option for an existing asset under management.

Development and major refurbishment activity is seen as a key opportunity to drive forward the ESG and sustainability agenda. When undertaking developments, we ensure a newly built property has an environmental certification (BREEAM, LEED, HQE, DNGB, Minergie), which corresponds to local market expectations. In addition to being a useful marketing tool, we consider certifications for new buildings as evidence, not only for the value we add, but also as a form of guarantee for the buildings' future value.

Within the UK portfolio, three major Central London projects have the following certification status: one mixed-use asset (a refurbishment, comprising 10,800 m²) has achieved BREEAM excellent, with two further office assets - new developments comprising 21,340 m² and 15,954 m² respectively - having been designed and built to BREEAM excellent standard. .

AXA Real Estate applies a strict sustainability policy - encompassing both initial construction and design and use - to all its developed buildings and this is reflected in contractual appointments.

In France, AXA was one of the pioneers in sustainable development and among the first to acquire the High Quality Environment (HQE) certificate for new asset development projects

**PR
23.6**

Describe the ESG information and how your organisation proactively discloses it to the public and/or clients/beneficiaries. [Optional]

A Global Sustainable Development Report has been produced over the last 3 years. The latest in November, 2013, reporting on global activity from 212 to 2013.

The report is publicly available but is distributed both electronically and hard copy form to all clients, potential clients or business partners.

The 2013 Report contained information on sustainability activities both at the global level and in the largest territories (by assets under management): France, Switzerland, UK and Germany.

In accordance with the GRI standards, the Report also contains:

- Organisational profile of AXA Real Estate
- Global strategy on stakeholder engagement
- Governance for sustainability - including approach to ESG and RI in real estate
- Sustainability in Action (case studies from the 4 territories)

The report is "global" and not fund specific, even at territory level.

- Disclose to clients/beneficiaries only
- No proactive disclosure to the public or to clients/beneficiaries

PR 23.7

Additional information. [Optional]

ESG information will also form part of regular real estate reporting on different client mandates.

In some instances, there may be price or market sensitive information at an asset level which does not get reported in the Global public report.
