RI TRANSPARENCY REPORT

2013/14

Capital Group International, Inc.

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

We believe that ESG factors can present material investment risks and opportunities. As long-term investors, these issues are particularly pertinent as they can affect value over multi-year timeframes.

Our approach is to fully integrate ESG issues into our investment philosophy and research process, rather than treating them as the responsibility of a separate team. Our investment professionals consider ESG issues alongside other financial and economic indicators in their fundamental analysis of companies and their value. The internal generation of research by our own analysts enables us to adopt a customized approach, rather than simple numerical screens provided by a third party. This enables us to distinguish, within a particular industry or sector, those companies that are better or worse at managing the ESG risks relevant to that industry. This can affect our investment decisions, as these risks can contribute to a decision not to invest in a company.

(A) Implementation: Screening

LEI 06

Mandatory

Descriptive

PRI 1

LEI 06.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

We do not apply any exclusion criteria for our funds except where required by law. We have a fiduciary duty to invest in a way that helps clients achieve their long-term investment objectives. Consistent with these objectives and our duties, our investment decisions are made based on the long-term financial opportunity offered by the selected securities.

We are aware that concerns about environmental, governance and social issues are important to many of our clients. Our approach to companies involved in industries about which some might have concerns is to engage with the companies rather than to categorically restrict investment in them.

For separate account clients who require a portfolio that avoids certain types of companies, we are generally able to implement an ethical screen where information regarding the screening criteria is readily accessible (such as tobacco, alcohol, etc).

- Positive/best-in-class screening
- Norms-based screening

Screened by

- UN Global Compact Principles
- Universal Declaration of Human Rights
- International Labour Organization Conventions
- United Nations Convention Against Corruption
- OECD Guidelines for Multinational Enterprises
- Other, specify

Description

The portfolio of a specific fund is screened for ESG purposes by an independent third party service provider elected by the fund's shareholders. The third party service provider assesses companies' adherence to global norms on environmental protection, human rights, labour standards, and anti-corruption. The portfolio is screened on a six monthly basis. Any companies in violation of global norms are excluded from the portfolio.

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

LEI 07.1	Indicate which processes your organisation uses to ensure that screening is based on robust analysis.
-----------------	---

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out

 - Yes, in the majority of cases
 - Yes, in the minority of cases

LEA 04.3	Describe how you monitor and evaluate the progress of your engagement activities.
-----------------	---

Engagement generally takes the form of engagement for information and engagement for influence. The former is more easily monitored and we attempt to keep a record of this type of engagement where it relates to ESG considerations. Engagement for influence is much harder to assess, as often the goal will move as the situation changes. The engagement may take place over several years. In many cases the outcome is a partial success, where a compromise is reached between the investor and management. Once again we attempt to monitor this engagement where it relates to ESG activity but it is not always clear whether the original goal is achieved. Again, we believe that a positive outcome will be reflected in the investment result.

FI 04.2

Describe your primary reasons for choosing a particular incorporation strategy.

We believe that ESG factors can present material investment risks and opportunities. As long-term investors, these issues are particularly pertinent as they can affect value over multi-year timeframes.

Our approach is to fully integrate ESG issues into our investment philosophy and research process, rather than treating them as the responsibility of a separate team. Our investment professionals consider ESG issues alongside other financial and economic indicators in their fundamental analysis of companies and their value. The internal generation of research by our own analysts enables us to adopt a customized approach, rather than simple numerical screens provided by a third party. This enables us to distinguish, within a particular industry or sector, those companies that are better or worse at managing the ESG risks relevant to that industry. This can affect our investment decisions, as these risks can contribute to a decision not to invest in a company.
