# RI TRANSPARENCY REPORT

## 2013/14

Culross Global Management

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

One of our advisory clients provides us with an ethical screening list for his portfolio on a regular basis, which excludes any companies considered as operating outside an appropriate ESG framework. We circulate the excluded equities list to the managers forming part of the client's portfolio and receive their feedback on whether they have any exposure to such instruments. A 15% exposure to such excluded instruments is allowed, and we monitor such exposure on a monthly basis to make sure that each fund stays below such a limit.

**OA 01.3** Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

Through the course of our business we do not directly make investments in companies, given our fund of hedge funds structure. However, we conduct initial due diligence and on-going monitoring to ensure the existence and maintenance of good governance standards among the operators and officers of the underlying managers forming part of our portfolios.

In screening and monitoring the activities of our discretionary managers, we keep in mind the UN Principles for Responsible Investment, and give encouragement and priority to managers whose investment process recognises their significance.

In certain cases it is impossible to accommodate specific Social Responsibility Investment (SRI) policies of multiple clients in a pooled fund of hedge funds. Individual clients' SRI policies will differ and possibly conflict, thus making it impossible to implement. In such instances, managed accounts tailored for the client's needs are offered as a solution.

We have a conflicts of interest policy in place in which we consider various types of potential conflict of interest scenarios. One such scenario is where a potential conflict of interest arises between one fund and another fund in the investment process. As a mitigating factor, we have an allocation policy which sets out how we should allocate the investment opportunity across the funds, in different scenarios.
