RI TRANSPARENCY REPORT

2013/14

Cordaid

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

| Symbol | Status |
|--------|---|
| ✓ | The signatory has completed all mandatory parts of this indicator |
| ☑ | The signatory has completed some parts of this indicator |
| 🔒 | This indicator was not relevant for this signatory |
| - | The signatory did not complete any part of this indicator |
| ⚠ | The signatory has flagged this indicator for internal review |

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Since 1997 the Cordaid Investment Fund (the Fund) combines the unique ability to finance partners with grants, equity and debt instruments in selected countries across three continents (Africa, Asia and Latin America). As of December 2013 the Fund has 83 million of assets under management and serves over 100 partners. The Fund predominantly invests in microfinance with a 'social mission' ($\pm 70\%$ of the committed portfolio). The Fund also invests in the empowerment of smallholder producers in the value chain in selected international and local markets through micro, small and medium enterprises (MSMEs), SME Funds and Small Producer organizations. The Fund's MFI Partners are serving over 4 million clients directly. The Fund's share in this direct outreach is estimated at nearly 300.000 clients (indirectly 1.5 mln people). The Fund investments in the SME's, SME Funds and Small producer organizations reach out to over 10.000 small producers (indirectly to 500.000 people). Collectively the Fund's portfolio impacts the lives of over 2 million people.

The governance, management structure and processes have been reviewed in 2012 and 2013. At the end of 2013 most of it is completed and all information has been laid down in a separate manual of the Cordaid investment Fund. Cordaid is also implementing a new MIS system that will include all relevant ESG data and which is expected to be ready before end of 2014.

The CORDAID Foundation ("Stichting Coraid") was created at the end of 1999 through the merger of three Catholic development aid organisations. Our source of inspiration is the Roman Catholic social doctrine of human dignity and respect for diversity, international solidarity, freedom to act on personal responsibility, and the preservation of the global public good. Cordaid excludes no one, and works both with Catholic partners and target groups and those of other persuasions; likewise, Cordaid does not discriminate by ethnicity, gender, sexual orientation or political conviction.

Cordaid fights poverty and exclusion in fragile states and areas of conflict and extreme inequality. Cordaid is based in The Hague, The Netherlands, where the organisation employs about 250 staff. Some 400 local staff and 35 expats are involved in implementation of development projects.

- No

OA 01.3

Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

In the policy of the Cordaid Investment Fund it is written that Cordaid (a development organization) will predominantly invest in Microfinance Institutions (MFIs) and Small and Medium Enterprises (SMEs) with a 'social mission'. Cordaid defined an MFI as an organization that provides financial services to the poor and low income people. This broad definition includes a wide range of providers that vary in their legal structure, mission, and methodology. However, all share the common characteristic of providing financial services to clients who are poorer and more vulnerable than traditional bank clients. Because of Cordaid's mission the Cordaid Investment Fund will focus its investments in fragile states or in the rural areas of developing countries. The policy states that the Fund must comply with the Principle of Responsible Investment as defined by the UNPRI as well as the Principles for Investments in Inclusive Finance (PIIF). Investees must adopt, endorse and comply with the generally accepted client protection principles. The Client Protection Principles are the minimum standards that MFI's are expected to respect when Cordaid invests in them.

The CFS Fund can also invest in indirect investees or vehicles. These are independent intermediary investment entities with assets invested in MFIs or Small and Medium Enterprises. With respect to above mentioned principles, the MFI Funds' indirect investees must have policies and practices in place to ensure that the referenced principles are complied with and appropriately reported to the Cordaid Investment Fund. An SME fund must have policies and practices in place based on international best practices (e.g. ILO). During the due diligence process investment managers are required to make an analysis of the social performance and management of the possible investee.

Cordaid has developed its own Social Performance Assessment Tool. This tool encompasses questions related to mission and vision; outreach and targeting; client protection; quality of client services; governance; gender; environment and responsibility to staff and community. The answers are differently weighted. A minimum score must be reached, otherwise the MFI is not eligible for an investment from Cordaid. Investees are required to report yearly on their social performance. The MIS of Cordaid is being updated to monitor better on these indicators. Investment Managers of Cordaid have received training to execute a social performance analysis and receive regularly training on Client Protection Principles and the Universal Standards of Social Performance Management. Besides investing in MFIs with debt or equity, Cordaid also has the opportunity to support the MFIs with grants. These grants will be used for the organizational strengthening and/or product diversification of the MFI.

Development of social performance management is a high priority for Cordaid. Besides giving funding directly to MFIs, Cordaid also funded worldwide initiatives to improve the microfinance sector. Cordaid financially supported ImpAct, MF Transparency and Women's World Banking. Cordaid is also supporting the Grameen Foundation in its effort to develop and scale up the Progress out of Poverty Index in Sub-Saharan Africa. Cordaid undersigned the Client Protections Principles and is actively engaged in the activities of the Social Performance Task Force.

Cordaid has a 'conflict of interest policy' which need to be adhered to (and signed) by all employees and board members of Cordaid.

In the main section of the policy it is mentioned that: 'Conflicts of interest can place personal interest at odds with fiduciary "duty of loyalty" owned to the Foundation. The duty of Loyalty requires a director, officer, employee or a member of a committee with governing board-delegated powers, to refrain from using his or her position for personal gain, and avoid acting on issuses in which his or her personal and financial interests could conflict with the interest of the Foundation'.

In the policy different kind of potential and actual conflict of interest are described and a procedure is prescribed for disclosing and resolving conflict of interests.

Add responsible investment objective 1

| | |
|--------------------------------|---|
| Objective 1 | ESG Policy ensures that all direct investees are assessed by using a ESG Scorecard, the so-called Social Performance Assessment (SPA) - tool |
| Key performance indicators | Indicators are used for social mission & vision, outreach & targeting, client protection, quality of services, governance, gender, environment and responsibility towards staff and community |
| Describe the progress achieved | Overall the scores are increasing and average is >70% which is in line with Cordaid policy |

Add responsible investment objective 2

| | |
|--------------------------------|---|
| Objective 2 | Social impact criteria are equally important to investment criteria and should target a balanced return that ensures below market financial return closer to capital preservation |
| Key performance indicators | performance indicators are set for social return like e.g. poverty outreach, gender, product range, and financial indicators like e.g. interest rates offered |
| Describe the progress achieved | Currently progress is not assessed at portfolio level but at level of individual investee during due diligence and monitoring visits |

Add responsible investment objective 3

| | |
|--------------------------------|--|
| Objective 3 | All Cordaid Contracts (including investments) need to comply with Corporate Social Responsibility policy |
| Key performance indicators | quality performance and behaviour indicators are set in several documents like : Code of Conduct, Code of Conduct Sexual Abuse, Anti-corruption policy, Exclusion policy |
| Describe the progress achieved | Investees are assessed against CSR policies and all new investees have to sign to guarantee compliance |

| | |

Add responsible investment objective 1 for the next reporting year

| | |
|---|---|
| Objective 1 for the next reporting year | Cordaid is currently upgrading its MIS system to ensure that ESG performance can be measured and reported annually |
| Key performance indicators | MIS will contain various performance indicators in the area of client protection, services to clients, poverty targeting, outreach, gender and staffing |

Add responsible investment objective 2 for the next reporting year

| | |
|---|--|
| Objective 2 for the next reporting year | The Cordaid ESG Scorecard (SPA tool) will be updated to USSPM standard and responsible covenants |
| Key performance indicators | Performance indicators with clear limits will be set in several areas such as financing structure, efficiency and profitability, portfolio quality and liquidity |

Inclusive finance

Brief description of investment

Cordaid Investments' main portfolio (called RURAF) is made of investments in rural and agricultural finance, through which we invest in financial institutions who reach out to small holder farmers and low income people living in rural areas, which are often underserved and/or do not have access to appropriate and affordable financial products and services that cater their needs and risks. Although not exclusively, in general through RURAF we invest in financial services for sustainable agriculture

Microfinance

Asset class invested

Inclusive finance

Brief description of investment

Cordaid has nearly 20 years of experience of supporting and investing in microfinance, both through grant making (to support capacity building, product development and customer services) and through investments in microfinance institutions MFIs). Initially we primarily invested in start-up MFIs or MFI start-up funds, but gradually we expanded the horizon to more mature organisations especially those that are serving rural clients and that reach out to underserved rural areas.

SME financing

Asset class invested

Inclusive finance

Brief description of investment

Until two years ago Cordaid was making direct investments in SME's in emerging markets, but since 2012 we have revised our strategy and only make indirect investments in SMEs in emerging markets. We now invest in SME Funds that work directly with small producers. As per policy a substantial segment of our SME portfolio should focus on food and agricultural sector. Indicators are set (among others) for the number of employees, jobs created and percentage of rural and agricultural investments.

As investment fund within a Development Organisation we are looking for synergies between the development experience in thematic areas like fragility, health, water & sanitation, entrepreneurship and food security and the possibilities to invest in financial intermediaries that service clients that are also serviced by other departments within Cordaid. This makes it possible to combine our thematic and geographic expertise with expertise in investing. In this way we can also blend investments with grants, that enables us to conduct research and pilot testing, that will improve services for customers and end-clients and that helps to mitigate risks and ensure financial sustainability.

In close collaboration with the Cordaid Entrepreneurship Department we are establishing a new fund for investment in microfinance and SME-finance in fragile states and regions, which by stimulating entrepreneurship will contribute to economic development and peace building.

In collaboration with the Cordaid Health Department that is specialised health performance based financing we are establishing a health investment fund that will make it possible to make small investments in infrastructure and equipment of hospitals, small clinics and dispensaries in a selected number of African countries.

IFD 01.1

Indicate if you have a distinct mission and investment objective for your investment in inclusive finance.

Yes

IFD 01.2

Describe your inclusive finance mission and investment objective.

Cordaid Investments predominantly invests in MFI's with a 'social mission'. Cordaid defines MFI's as organisations that provide financial services to the poor and low income people. Because of Cordaid's mission we focus on investments on fragile states and regions, and on investments in rural areas in developing countries.

Cordaid Investment objective is to support and cooperate with investees that have a strong development orientation, which means they focus on deprived and vulnerable groups, and/or want to work in hard-to-reach and underserved areas. This means that the investees take the socio-environmental context of their clients as a starting point. The design and delivery of their services explicitly integrate social (including gender), environmental and financial dimensions in order to improve the economic and social conditions of clients (triple bottom line). This implies that there is integration and balancing of financial and social returns.

No

Guiding Principles

Cordaid Investments is based on the following guiding principles which apply to all Investments managed by Cordaid.

Principles for Responsible Finance

Cordaid investment funds must comply with the Principles for Responsible Investment (PRI) as defined by the UN PRI as well as the Principles for Investors in Inclusive Finance (PIIF).

Client Protection Principles

Investees must adopt, endorse and comply with the generally accepted client protection principles. The Client Protection Principles are the minimum standards that clients should expect to receive when doing business with a microfinance institution.

Investees (direct)

Cordaid investment funds will invest in Microfinance Institutions (MFIs). A microfinance institution (MFI) is an organisation that provides financial services to the poor and low income people. This broad definition includes a wide range of providers that vary in their legal structure, mission and methodology. However, all share the common characteristic of providing financial services to clients who are poorer and more vulnerable than traditional bank clients.

Reporting

MFIs investees must report on the Financial Performance, Social Performance and Development Impact of their activities by applying the standards and tools developed by The Consultative Group to Assist the Poor (CGAP) and Mix Market.

Balanced Returns

Cordaid investments seek an optimal social impact and an acceptable financial return.

IFD 02.1 Provide a brief description of the governance and management structures and processes you have in place for your responsible investment activities and implementation of the PIIF.

CORDAID has developed a ESG scorecard (so-called Social Performance Assessment (SPA) - Tool) that looks at key social and environmental performance indicators and that is used for due diligence and monitoring of all microfinance investments.

We have trained our staff (all Investment Managers) in social performance management and the knowledge on SPM is updated regularly.

Our overall target is to support financial institutions that provide services to (very) poor and low income clients in developing countries in Africa, Asia, Latin America and Sub-Saharan Africa. At least 25% of investments should be in Sub-Saharan Africa. Moreover, since two years we are also targeting financial access in fragile countries and regions, especially in African countries (like South Sudan, DRC Congo and Sierra Leone).

For all investees the ESG scorecard has to be filled in. The minimum score is set at 50 out of 100 and the average score for our rural and agricultural portfolio is set as 70+ .

We have also set targets for rural outreach, with a minimum of 50% (measured by number of branches in rural areas)

Cordaid has a grant policy that makes it possible to provide TA to its investees. When providing TA in most cases specialised technical service providers are contracted. We collaborate with organisations like Microsave (in India and Africa), with Ayani (in Africa) and Rimansi (for micro-insurance in South East Asia). In rare cases we have provided TA directly ourselves.

The TA that is supported contains a wide range of areas that can enhance the financial and/or social performance of an MFI. Typical areas for TA support are strengthening the management and board, risk-management and MIS. Cordaid has a special focus to provide TA for agricultural product development and SPM.

We discuss with the investee how they disclose this information to their clients and if they do this in a transparent way.

This is also one of the elements assessed in our ESG Scorecard. If the score is too low this is a reason for not investing. Nevertheless we cannot enforce this in all cases because of competition and unawareness of the Smart Campaign in some countries, especially in fragile states like for example DRC and South Sudan.

IFD 28.2

Explain how social performance of investees affects investment decision making.

As our primary aim is to invest in financial institutions that have a social mission, it is important for us that all investees have a clear social mission and that this mission is put into practice and the investee pays attention to social performance management. Several SPM-areas are reviewed by us and the information is laid down in our ESG Scorecard. An organisation has to score a minimum of 50 (out of 100) to be eligible for an investment. If certain standards are not sufficiently in place, we can agree with the investee a trajectory for improvement. We may provide additional support and/or decide to formulate the desired outcome in a social covenant that will be part of the investment agreement.

Yes

IFD 28.3

Explain how social performance of investees affects portfolio management.

We monitor social performance of our portfolio in several ways, for example to look at ESG-score (average should be above 70), to look at outreach in rural areas (average should be over 50%), the offering of agricultural products (target is 30%), gender composition and poverty level of the clients.

We are currently working on a new MIS that will strictly follow the social performance of all investees on an annual basis. For MFI's we will align this information with social and outreach data reported to the Mixmarket.

Contractual agreements and mandate design

| IFI 03 | Mandatory | Core Assessed | General |
|--------|-----------|---------------|---------|
|--------|-----------|---------------|---------|

IFI 03.1 When agreeing contracts and designing mandates with investment managers, in the process, indicate if you consider including the following issues referred to in the PIIF:

Actively supporting retail providers to innovate and expand the range of financial services to low-income people (Principle 1)

- Yes

Describe and indicate how.

In most of the contracts with indirect investees it is clearly stated what kind of MFIs and what kind of services these MFIs should provide to their clients. Besides, in 50% of our indirect investees Cordaid has a board seat. During board meetings Cordaid also addresses these issues.

- No

Integration of client protection in investment policies and practices (Principle 2)

- Yes

Describe and indicate how.

This is not (yet) explicitly mentioned in our contracts but during meetings the issue is discussed.

In 50% of our indirect investees Cordaid has a board seat. During board meetings Cordaid addresses this issue. In countries where there was a crisis, like in India, it has become more easy to address this issue in boards of indirect investees and discuss this issue with the management of direct investees. This issue has therefore received more attention in the Cordaid due diligence process of the investment managers. Some of the investment funds have developed their own ESG scorecard and report this to Cordaid. Social Performance criteria, including client protection, are in the process to be set and to which all investment managers of externally managed funds need to report.

No

Treating investees fairly with appropriate financing needs that meets demand, clear and balanced contracts and fair processes for resolving disputes (Principle 3)

Yes

Describe and indicate how.

We do not explicitly refer to fair treatment in our contracts with externally managed investment funds, but during meetings this issue is addressed.

No

The inclusion of ESG issues in investment policies and reporting (Principle 4)

Yes

Describe and indicate how.

ESG issues are part of some of our contracts with externally managed investment funds. Besides, in 50% of our indirect investees Cordaid has a board seat. During board meetings Cordaid addresses this issue.

Some of the investment funds in MFI's have developed their own ESG scorecard and report on this to Cordaid. Some of the investment funds in SME's have developed a social audit process in which ESG issues of their investees are tracked. We have played an active role in the development of ESG scorecard and social audit systems that are used by some of the investment funds in which we invest. One such case is the PYME Capital Fund for Latin America.

No

Active promotion of transparency in all aspects (Principle 5)

Yes

Describe and indicate how.

We do not explicitly refer to transparency in our contracts with externally managed investment funds, but during meetings this issue is addressed.

No

Striving for a balanced long-term social and financial risk-adjusted return that recognises the interests of clients, retail providers and investors (Principle 6)

Yes

Describe and indicate how.

Balance financial and financial returns of the investment fund is one of the key elements for Cordaid that we look into during the pre-investment process. So far in most cases balanced returns have not (yet) been explicitly mentioned in contracts with externally managed investment funds. The issue is addressed during due diligence and board meetings (in 50% of our indirect investees Cordaid has a board seat) and we expect investments managers to report on both financial and social returns.

No

Collaborating to set harmonised investor standards that support the further development of inclusive finance (Principle 7)

Yes

Describe and indicate how.

We do not refer to standards in contracts with externally managed investment funds, but this issue is addressed in meetings. In 50% of our indirect investees Cordaid has a board seat. During board meetings Cordaid addresses this issue. The Social Performance criteria that are set are becoming aligned with the standards of SPTF& MIX or IRIS.

|---------------|------------------|----------------------|----------------|

IFI 04.1 Indicate if you monitor your current investment managers' implementation of the PIIF principles.

Yes

IFI 04.2 Indicate the frequency of reporting you typically require.

- Annually or more frequently
- Every two years or less
- Ad-hoc, specify

So far monitoring is based on Cordaid's participation in board meetings and on the reporting agreements with investment managers. Developing process for annual reporting.
