RI TRANSPARENCY REPORT

2013/14

Danske Bank

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

Overview

LEI 02	Voluntary	Descriptive	PRI 1
LEI 02.1	Provide a brief overview of how you incorporate ESG issues in listed equity investments.		

The RI screening is performed by our SRI advisor, which is an independent, specialised RI consultant. The overall responsibility for the screening process lies with the RI working Group, in which Danske Capital, Danske Invest and Danica are members.

The screening process: Our advisor clarifies the circumstances under which companies are alleged to have violated international norms. The cases are often complex and dynamic. The analysis is typically conducted as follows:

Our advisor begins by evaluating information from a large number of sources (e.g., the UN, other inter-governmental organisations, national authorities, NGOs and the media) about alleged corporate involvement in activities that violate international norms. Our advisor then seeks to verify the allegations through official sources and to determine whether the violations are sustained, severe and systematic. Throughout the process, our advisor pursues a dialogue with the company and other relevant stakeholders. Our advisor provides the Responsibility Board of Danske Bank Group with the results of its analyses, and the Board decides whether to exclude the securities from the investment universe or to engage further in an active shareholder dialogue.

The dialogue process: The purpose of the dialogue is to ensure that the information used as the basis of the decision is adequate and accurate and to determine whether the company plans to change its behaviour regarding the issue. The process may be both written and oral, contains a range of elements: Inquiries made to the company about supplementary information. Requests that the company explain any uncertainties arising in the response to the first letter. Assessment of whether the company plans to change its behaviour regarding the issue. Depending on the result of the dialogue, the Group's Responsibility Board decides whether the company is to be excluded.

Engagement

Overview

LEA 01	Voluntary	Descriptive	PRI 2
LEA 01.1	Provide a brief overview of your organisation's approach to engagement.		

Company dialogue and engagement is an integrated part of the way we invest. Engagement is a preferred method of communicating as opposed to immediate exclusion of companies from our investment universe.

We prefer to cooperate with other investors to increase the impact of our efforts on a company level but also in supporting a mutually beneficial value creation in society.

If escalated engagement has proven pointless exclusion of companies from the investment universe is the last possibility. If a company produces illegal products - such as anti-personal mines or cluster munitions or nuclear weapons the company is excluded without any previous dialogue.
