# RI TRANSPARENCY REPORT

## 2013/14

Dalton Nicol Reid

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

## PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. While this information is believed to be reliable, no representations or warranties are made as to its accuracy and no responsibility or liability can be accepted for any error or omission.

~Dalton Nicol Reid manage a Socially Responsible portfolio that avoids investment in companies that are judged to have a direct involvement in pornography, gambling, armaments and tobacco. We form a judgment as to whether or not the activity in question forms a direct or core part of the business. By "direct" or "core" we mean that the company is involved in the manufacture, supply or distribution of the product or the provision of the service. The overriding investment strategy and approach follows that of the main Australian High Conviction portfolio, before integrating ethical, sustainable and responsible approaches to research and filter parameters. To assist with the research and filters, Dalton Nicol Reid consults with the Corporate Analysis Enhanced Responsibility (CAER). CAER is an independent, notforprofit research organisation that assist investors seeking to apply environmental, social and governance (ESG) criteria to their Australian and international investments. The Socially Responsible portfolio is a Responsible Investment Association Australasia (RIAA) Certified Responsible Investment. The ESG research tools have enabled Dalton Nicol Reid to begin to implement ESG criteria into the mainstream investment process. An ESG review has been added to Stage 2 of our investment process which focuses on stock research. By formally including this into our investment process this has led to increased engagement with companies on ESG issues, and factoring in risks relating to poor ESG practices in the stock evaluation process.
