# RI TRANSPARENCY REPORT

## 2013/14

Dasos Capital Oy

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

## PRI disclaimer

- Yes
- No

**OA 01.2** Indicate if you have other guidance documents or more specific policies related to responsible investment.

- Yes
- No

**OA 01.3** Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

Dasos Forest Investment Policy incorporates ESG-related principles and forestry specific environmental and social policies and guidelines which guide investment process. Forest Investment Policy integrates IFC's environmental and social policies and safeguards, EU's environmental policies and the Equator Principles.

Dasos carries out systematic assessment of social and environmental risks during pre-DD and DD following developed guidelines. Environmental and Social Screening Guidelines provide general guidance on environmental and social impact assessment (ESIA) during the DD and investment decision-making process, and also on managing social and environmental performance throughout the life of the investment. The Environmental and Social DD checklist is applied systematically in every DD exercise. ESIA is applied with varying intensity to identify and assess social and environment impacts, both adverse and beneficial, in the project's area of influence, and identify ways of mitigating negative impacts and enhancing positive impacts during investment execution to manage the environmental, social and reputational risks and to enhance the value of the asset..

The policy also places limits on where to invest; e.g. tropical and sub-tropical natural forests are excluded, and forest assets must be certifiable to demonstrate sustainability. Measurement and reporting of sustainability performance annually through certification (e.g. FSC or PEFC).
