RI TRANSPARENCY REPORT

2013/14

Earth Capital Partners LLP

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

The ECP Sustainable Development Policy, reviewed annually, applies to all ECP activities. The Policy commits ECP to actions which include:

- o Considering ESG issues in all Investment Committee approvals and portfolio company reviews; and
- o Measuring, monitoring and reporting the SD impact of investments, using ECP's proprietary Earth Dividend™ ESG scorecard and agree with each investment an annual performance improvement plan.

A full copy of the Policy is available for review at, <http://www.earthcp.com/sustainability/policy>.

ESG issues are fully integrated into Investment Analysis using ECP's Sustainable Development Investment Guidelines, which comprise a 'filter' through which all ECP investments made from all funds must pass. They set out 'no-go' areas into which ECP funds will not invest and minimum standards which all must meet.

The evaluation of SD impact forms an integral part of the ECP Investment Process ("IP"), including early stage transaction evaluation, due diligence, Investment Committee membership and Terms of Reference, and investment approval and portfolio monitoring processes and criteria.

ESG issues are integrated into the Portfolio Management & Reporting processes using the Earth Dividend™. The Earth Dividend™ provides an annual measure of the SD impact (positive and negative) of each ECP fund investment across 30 ESG impact indicators (10 indicators for early stage technology investments and small infrastructure projects).

The Earth Dividend™ is governed by ECP's SD Internal Controls. It is also subject to an independent external assurance audit and review by the independent ECP Sustainability Council. The most recent audit was completed by KPMG.

To formalise consultation and input from external stakeholder groups into ECP's governance processes, ECP established a stakeholder advisory board, the Sustainability Council, early in 2009, chaired by Tom Burke CBE. The Council has provided detailed review of the ECP SD Policy, Investment Guidelines and Earth Dividend™, and reviews ongoing implementation of these policies and procedures. All the Council's recommendations to date have been accepted and actioned by ECP.

The evaluation of SD impact forms an integral part of the ECP Investment Process ("IP"), including early stage transaction evaluation, due diligence, Investment Committee membership and Terms of Reference, and investment approval and portfolio monitoring processes and criteria.

Earth Capital Partners LLP has developed two versions of the Earth Dividend™ - one tailored to physical assets (infrastructure) and one to companies. Both versions investigate 30 different social, economic, environmental and governance indicators (10 for investments classified as 'small& medium sized enterprizes' and infrastructure with a capital cost below USD10 million).

The Earth Dividend™ is governed by ECP's SD Internal Controls. It is also subject to an independent external assurance audit, most recently by KPMG and review by the independent ECP Sustainability Council.

The ECP IP (including the related SD Due Diligence Process) and the Investment Committee Terms of Reference make it mandatory for ESG information to be gathered, assessed and confirmed to meet ECP ESG standards (see below) prior to an investment being made. The same ESG issues are monitored through the life of the investment to ensure that ECP's minimum standards and 'no-goes' remain in force.

The Earth Dividend™ scorecard ESG assessment is completed annually for an investment. Opportunities for improvement in the ESG impacts are explored with investee management annually and focus towards those ESG impact improvements which offer commercial benefits.
