RI TRANSPARENCY REPORT

2013/14

Gestión de Previsión y Pensiones E.G.F.P

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. While this information is believed to be reliable, no representations or warranties are made as to its accuracy and no responsibility or liability can be accepted for any error or omission.

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

Gestion de Previsión y Pensiones, E.G.F.P., S.A.'s (GPP) policy is based on four main pillars:

1. Integration of ESG issues in the investment process: The integration of ESG issues in the investment process is coherent with our fiduciary duty to protect our clients interests. Thus, GPP has considered the previous approach in its strategic investment process for all the Pension Funds under management in order to improve the risk return profile of the investments, accomplishing at the same time with the social responsibility goals inherent to Pension Funds. We are analysing the major European sectors and governments, using third party research, in order to be able to identify the relevant issues from ESG perspective and ranking companies and governments according to their credentials.
2. Rules of Conduct in Defence: The BBVA Defence Rule applies to all units and subsidiaries of the BBVA Group Worldwide and to all financial services. For the purposes of this policy, BBVA uses exclusion lists of companies and countries, prepared and regularly updated with the help of independent experts.
3. Proxy Voting: In both Spanish and European companies for the listed equity managed in our portfolios.
4. Engagement: Through our participation in associations such as Spainsif (Spain Social Investment Forum), in which GPP is a partner founder since 2008. This association aims to promote changes in the investment process and the investment community, such as governments, businesses and the public in general. Additionally, GPP has engaged with companies to motivate them to make more flexible the process of Proxy Voting through electronic ways.

OA 08.3

Additional information. [Optional]

As previously mentioned, GPP as part of BBVA Asset Management, subsidiary of BBVA, is consistent with its commitment about the development and progress of Responsible Investment Strategies and its implementation. Thus, the organization is making a great effort by increasing the resources dedicated to these matters. Currently, five out of those six people mentioned dedicate part time work to SRI, and the new incorporation will be full time work dedicated.

The six employees previously mentioned are hired in BBVA Asset Management, who gives support to GPP. The daily tasks and objectives are developed and achieved with the support of BBVA Asset Management. From resources perspective, there is no differentiation between the employees from one organization or another.

Moreover, it is relevant to emphasise that GPP has hired top of the service providers worldwide for proxy voting and research activities related to the process of ESG integration in the investment process.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

We have considered integration as the most complete and efficient tool for considering non-financial information in the investment process. With this approach we are able to consider both fundamental and ESG analysis, maximizing the risk-return of our portfolios. As mentioned in previous modules, GPP also applies the exclusion for matters related with the "Rules of Conduct in Defence".
