RI TRANSPARENCY REPORT

2013/14

HgCapital LLP

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

We are the owners of our own business, having established the partnership in 2000, and try to practise what we preach. Over the last decade we have progressively invested in our partnership to establish a robust and properly aligned private equity investment platform. With 100 employees in two investment offices in the UK and Germany, HgCapital has assets under management of £5.2 billion, serving over 100 highly regarded institutional investors, including private and public pension funds, endowments, insurance companies and fund of funds.

HgCapital began life as Mercury Private Equity, the private equity arm of Mercury Asset Management plc, a long-established UK-based asset management firm. Mercury Asset Management was acquired by Merrill Lynch in 1997. In December 2000, the executives of Mercury Private Equity negotiated independence from Merrill Lynch, and HgCapital was created as a fully independent firm, wholly owned by its partners and employees, who together work with a common purpose and culture.

Today investment teams manage three investment funds, HgCapital 7, our latest mid-market buyout fund, RPP2 our renewable energy infrastructure fund and HgCapital Mercury, our TMT focused small buyout fund.

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

HgCapital's investment philosophy is based on creating value driven by sustainable growth. We believe that this approach will allow HgCapital to deliver superior returns for our clients by investing in the provision of services and resources from which entire communities can benefit.

To support this philosophy and our approach to responsible investment, HgCapital considers five RI focus areas in making investment decisions and evaluating portfolio companies, namely: Environment, Workplace, Marketplace, Governance, and Community.

To HgCapital, responsible investment ('RI') is about investing in opportunities that seek to generate both financial value and sustainable growth. We believe that businesses which actively engage with the social responsibility agenda achieve higher performance than their peers, which do not do so and this enhances returns for our investors. Our RI approach supports the backbone of our investment philosophy which is to invest in growth companies and sectors, rather than turnaround or distressed investing: we aim to make excellent investment returns for our clients by growing high-quality, socially responsible businesses, which create lasting, value-adding jobs in Western Europe and elsewhere. Furthermore, one of our investment teams is dedicated to investing in renewable energy projects through a dedicated fund.

We believe that businesses must preserve the trust of stakeholders in order to create long-term value for investors. As part of our RI approach, we take an active interest in how companies in our portfolio manage environmental, social, and governance ('ESG') issues and, on behalf of our clients, encourage and support companies to adhere to standards of best practice for responsible business.
