

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

-------	-----------	-----------------------	---------

OA 01.1 Indicate if you have a responsible investment policy.

- Yes
 No

OA 01.2 Indicate if you have other guidance documents or more specific policies related to responsible investment.

- Yes
 No

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

As a general insurance company with a short-tail liability profile, our overarching investment objective is to match the insurance liabilities with high quality / sovereign fixed income instruments. A very high credit quality (AAA/AA) portfolio, evaluated by external credit ratings, as well as internal assessments, is the overarching mandate in our investment process. This is foremost governed by the Group's Credit Policy. Furthermore, our investment related policies are insurance and asset management industry regulatory and corporate law in nature. A smaller component of our FUM is allocated to non-fixed income asset classes, this is mostly managed via external managers (how we view these managers in the context of ESG is covered in later sections) with appropriate mandates and policy oversight.

OA 04	Mandatory	Core Assessed	General
-------	-----------	---------------	---------

OA 04.1 Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

- Yes

OA 04.2

Describe your policy on managing potential conflicts of interest in the investment process. [Optional]

The aim of the IAG Asset Management Conflict of Interest Policy is to ensure that IAGAM complies with IAG Group requirements and regulatory requirements, fiduciary and contractual obligations, and industry membership obligations.

1. IAG Group requirements

IAGAM is required to ensure that its policies and/or procedures:

- Proactively identify areas in which a COI may arise within the Business Unit;
- Evaluate the risk posed by those conflicts;
- Decide how to manage those conflicts if and when they arise; and
- Have in place a 'reporting mechanism' for COI.

Employees must report all suspected conflicts of interest on the Conflicts of Interest Register on OneSource and to their immediate manager.

2. Regulatory requirements

As an Australian Financial Services Licence (AFSL) holder, IAGAM is required to comply with ASIC Regulatory Guide 181 Licensing: Managing Conflicts of Interest.

3. IAGAM's fiduciary obligations as Trustee of the IAGAM Wholesale Trusts

These include obligations set out in the Trust Deeds and common law principles.

4. IAGAM's Contractual Obligations

IAGAM is required to have appropriate Conflicts of Interest procedures in place,

5. Investment & Financial Services Association (IFSA) Standards

As an IFSA member, IAGAM is required to comply with relevant IFSA Standards and Guidance Notes including Standard No. 1 Code of Ethics & Code of Conduct, and provide an annual Board sign off to confirm that this is the case.
