RI TRANSPARENCY REPORT

2013/14

Latour Capital Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

As a new entrant on the market, the Fund has no conflict of interest with lenders, thus enabling it to negotiate under the best conditions the refinancing of company debt, without the weight of the past.

Strict rules for corporate governance have been provided for in order to ensure the independence of the Management Team and to prevent any conflict of interest between the investors and the Management Team.

First: the Fund has set up an Advisory Committee consisting of five to seven appointees representing the Fund's main investors. The Advisory Committee gives advice to the Management Company on issues related primarily to the Fund's investments, and resolves conflicts of interest and any other issue on which the Management Company could consult it, according to the Fund's By-laws. The Advisory Committee's prior consent is required for decisions taken by the Investment Committee as soon as a conflict of interest is detected by the internal control and compliance officer of the Management Company, or by Corevise which acts as service provider on its behalf in this respect, or in case of an investment decision which is outside of the Fund's investment policy.

Second: the Management Company of the Fund, according to the rules applying to companies approved by the AMF, have recourse to an external service provider to follow up on internal controls and compliance rules. The company Corevise is in charge of supporting the internal controls and compliance matters in the implementation of second-level permanent controlling as defined within the AMF's General Regulations.
