RI TRANSPARENCY REPORT

2013/14

Limestone Investment Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. While this information is believed to be reliable, no representations or warranties are made as to its accuracy and no responsibility or liability can be accepted for any error or omission.

---------	---

Northern Star believes, that companies that are able to manage environmental, social and governance (ESG) issues increase the value of our investment. They consider that it is a fiduciary duty to its clients and the society in general to motivate sustainable business practises among the businesses they invest in and to incorporate ESG issues to their investment decision process.

Northern Star has taken on a unique challenge to build up an emerging markets multi-boutique platform with a dedicated focus on sustainability and responsible investing.

- Mainstream investment community still views anything that has to do with social responsibility or sustainability with a fair share of suspicion. Prevailing view of SRI investing is that it requires for immediate sacrifices in the performance and selection of opportunities, for the sake of doubtful benefits in the unclear future. This should not be the case. Northern Star investment team`s minimum exclusion and integrated research approach adds value from day one without any sacrifices. The team hopes that by increasing the size of their business they reach more investors and help turn socially responsible investing concept from "frown upon" into "smiled upon".

- All investment portfolios would benefit from managing ESG risks, but it is in emerging markets where the degree is most acute. Gathering and assessing environmental, social and governance information, and limiting exposure to risks associated with extra financial factors significantly reduces "tail risk" - the risk of unlikely events causing catastrophic damage. The real challenge hereby is the significant information problem. This can only be tackled by building up an in-house research process that is capable of gathering the necessary information from outside the public data vendors' services, and to integrate it into company valuation methodology.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

Especially in emerging markets, lacking or asymmetrical information along with limited transparency causes widely fluctuating perceptions in risk and value. Consequent pricing inefficiencies can be uncovered and exploited by bottom-up fundamental research driven active portfolio management. ESG considerations are thus primarily incorporated into company level valuation process that is complemented by country level risk assessment.

- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Northern Star investment process is geared towards limiting limiting exposure to risks associated with extra financial factors that can significantly reduce "tail risk" of our investment portfolios. We measure country based ESG performance, and individual company level ESG scores to manage the related risks.

- Positive/best-in-class screening
- Norms-based screening

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
-----------------	---

Fundamental ESG screening scores are a combination of external ratings and in-house scoring performed based on sector specific questionnaires. The criteria are reviewed annually, but have remained stable historically.

LEI 07	Mandatory	Core Assessed	PRI 1
---------------	------------------	----------------------	--------------

LEI 07.1	Indicate which processes your organisation uses to ensure that screening is based on robust analysis.
-----------------	---

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
- None of the above

Process

Process for engagements run internally

LEA 03	Mandatory	Core Assessed	PRI 2
--------	-----------	---------------	-------

LEA 03.1 Indicate whether your organisation has a formal process for identifying and prioritising engagement activities carried out by internal staff.

☉ Yes

LEA
03.2

Describe how you identify and prioritise engagements.

Northern Star will engage with target companies when we are unable to conduct basic ESG or financial analysis due to a lack of publicly available information or when our analysis indicates that certain ESG issues have an impact on company earnings or value, or have the potential to do so.

NS will concentrate on material, company specific issues that are determined during analysis and where we believe we can wield influence towards achieving a specific outcome. Company engagement will be carried out on a direct basis, e.g. correspondence requesting information and/or clarification, meeting with management and indirectly via proxy voting process.

The responsible portfolio managers and their investment teams will carry out company engagement.

NS takes ownership and engagement seriously and will only engage with companies with tangible issues. To ensure good ESG practises and protect investor interests, NS may consider disinvestment in instances where management does not respond adequately.
