RI TRANSPARENCY REPORT

2013/14

Longview Partners

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

OA 03.3 Additional information. [Optional]

Assessing the significance of ESG related risks and opportunities is an integral part of our bottom-up research process. Governance issues are considered within our Quality rating. The key element of this analysis is the company's treatment of shareholders and its use of capital. On environmental matters, we believe that a lack of consideration for environmental issues can negatively impact the growth of a business and its long and short term profitability. However, we consider social issues to be moral judgments and therefore a matter of opinion and, as such, we rely on our client's direction.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

We evaluate the effectiveness of companies' management on ESG issues and if a company's past, current or anticipated behaviour is judged to be adverse to its future earnings, these concerns are addressed in our fundamental research and investment process. Poor performance on corporate governance issues would be reflected in our longer term Quality rating that we give companies and would have a direct impact on our investment decision. Companies with poor governance are unlikely to allocate capital effectively, which would cause them to destroy shareholder value.

(C) Implementation: Integration of ESG issues

LEI 11	Mandatory	Core Assessed	PRI 1
--------	-----------	---------------	-------

LEI 11.1 Indicate if E, S and G issues are reviewed while researching companies and/or sectors in active strategies.

Corporate Governance	<input checked="" type="radio"/> We systematically review the potential significance of corporate governance issues and investigate them accordingly <input type="radio"/> We occasionally review the potential significance of corporate governance issues and investigate them accordingly <input type="radio"/> We do not review corporate governance issues

LEI 11.2 Additional information. [Optional]

On environmental matters, we believe that a lack of consideration for environmental issues can negatively impact the growth of a business and its long and short- term profitability.

We include in our process any factor that, in our judgement, will affect the economic performance of companies over time; which includes the analysis of both financial, and non-financial, risks and opportunities. For example, where relevant, we consider climate change as to how it affects the long-term competitiveness of a business, reflected in our Quality rating, and the short term earnings, reflected in our Fundamentals rating.

We engage with companies on corporate governance issues as part of our overall investment strategy. "Engagement" to us means that we seek to meet with company board directors and executives to discuss strategy and corporate responsibility issues. We are comfortable discussing any contentious issues on company meeting agendas and have ongoing dialogue with management regarding the outlook of the business and the issues and risks affecting it. Consequently, we are able to evaluate any resulting management decisions and actions. We will also discuss the quality of the company's reporting as well as the finance and remuneration schemes and strongly support those that align management's interests with those of shareholders. We incorporate the results from our engagement into our investment criteria. Whilst we put our views forward strongly in these meetings, we do not consider ourselves activist. Ultimately, if after lengthy discussions we believed management was failing to act in shareholders' interests, we would tend to sell our holding in order to minimise the loss of shareholder value.

Our policy on engagement focuses on meetings and dialogue with company directors and management on a one-on-one basis. Collective engagement with other shareholders would be considered if we believed this would result in a more positive outcome for our clients, is consistent with our policies and procedures and meets all legal requirements. For example, collective engagement would be considered prior to an important company vote, where we felt that our ability to lobby other investors may result in a more positive outcome for our clients. Consequently, we are able to evaluate any resulting management decisions and actions. Ultimately, if after lengthy discussions we believed management was failing to act in shareholders' interests, we would tend to sell our holding in order to minimise the loss of shareholder value.

We would anticipate collaboration at this level to be infrequent.
