# RI TRANSPARENCY REPORT

## 2013/14

Lloyds Banking Group

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

## PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. While this information is believed to be reliable, no representations or warranties are made as to its accuracy and no responsibility or liability can be accepted for any error or omission.

Lloyds Banking Group makes investments on behalf of our clients with the goal of delivering long-term financial benefits. We are committed to achieving these benefits in accordance with high standards of corporate governance and responsible investment practices.

On behalf of our customers, we make investments around the world in equities, bonds, property assets and investment funds. In making these investments we encounter a range of important environmental, social and governance (ESG) challenges. These challenges include climate change, scarcity of natural resources, globalisation of supply chains, and ensuring company boards exercise their governance responsibilities effectively.

Our Responsible Investment policy sets out our approach to handling ESG issues. It should be considered in tandem with other associated policies such as the Group's Environmental policy and Corporate Governance policies.

We work to ensure our approach to addressing ESG issues in investment is effective, by doing the following:

1. We take due account of ESG risks in our investment decisions
2. As an active and responsible owner, we use our influence to encourage companies to manage ESG risks effectively. We support the UK Stewardship Code.
3. We seek to avoid investment in activities that are illegal according to international conventions endorsed by the UK government
4. We take account of ESG issues when we appoint asset managers to manage our clients' funds, and monitor their activity closely
5. We provide ethical and sustainable investment options for our customers
