# RI TRANSPARENCY REPORT

## 2013/14

Mizuho Trust & Banking Co., Ltd

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

## PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. While this information is believed to be reliable, no representations or warranties are made as to its accuracy and no responsibility or liability can be accepted for any error or omission.

**LEI 03.2**

Describe your primary reasons for choosing a particular ESG incorporation strategy.

We incorporate ESG issues as a part of internal corporate research and investment decision-making process, because sustainability is consistent concept with our investment philosophy.

Our Japan equity active investment strategies are based on analysts' forecasts on profitability and growth potential of companies on the long-term basis, and we believe sustainability is a precondition for superior performance in the long run. We consider that sustainability depends heavily on good relationship between the corporations and its various stakeholders, such as customers, employees, and subcontractors. In addition, complying fully with laws, regulations, and requirements is also crucial. Especially for retail business, a reputation as environmentally conscious company may enhance its brand image and competitive edge. Therefore, we consider our investee companies must have a certain degree of CSR level in terms of sustainability.

--------	-----------	---------------	-------

**LEA 22.1** For listed equities where you and/or your service provider has the mandate to issue (proxy) voting instructions, indicate the percentage of votes cast during the reporting year.

We do track or collect this information

Votes cast (to the nearest 1%)

%

99

Specify the basis on which this percentage is calculated

- of the total number of ballot items on which you could have issued instructions
- of the total number of company meetings at which you could have voted
- of the total value of your listed equity holdings on which you could have voted

**LEA 22.2** If there are specific reasons why you did not vote certain holdings, explain these, and if possible, indicate the percentage of holdings affected by these factors. [Optional]

On a cost-efficiency basis, we do not vote holdings on some foreign countries.
