RI TRANSPARENCY REPORT

2013/14

Portobello Capital

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

OA 06.1

List your three main responsible investment objectives you had set for the reporting year. For each, indicate any key performance indicators you set to measure your progress and also indicate your progress towards achieving your objectives.

- Add responsible investment objective 1

Objective 1	Better record engagement activities
Key performance indicators	Surveys distributed annually amongst portfolio companies to identify weaknesses and opportunities in terms of ESG issues
Describe the progress achieved	Identified several weaknesses (and opportunities) that could be implemented across other portfolio companies

- Add responsible investment objective 2

Objective 2	Participate in collaborative initiatives
Key performance indicators	Agreement with Fundacion Integra whose mission is to facilitate the insertion to the labour market of people at high risk of social exclusion
Describe the progress achieved	At least 3 of our portfolio companies have already employed people through this Foundation

- Add responsible investment objective 3

Objective 3	Establish a Responsible Investment Policy
Key performance indicators	Issue the corresponding documentation to be available to LPs or potential investors
Describe the progress achieved	During this reporting year, Portobello has approved its RI policy

OA 06.2

List your three main objectives for responsible investment implementation for the next reporting year and indicate any key performance indicators you intend to use to measure your progress.

- Add responsible investment objective 1 for the next reporting year

Objective 1 for the next reporting year	ESG improvement on portfolio companies
Key performance indicators	Engage with companies in order to persuade them to make a specific change to their management of ESG issues

- Add responsible investment objective 2 for the next reporting year

Objective 2 for the next reporting year	Participate in collaborative initiatives
Key performance indicators	Find new organisations that we could cooperate with and that could help promoting RI in our company and our portfolio companies.

Add responsible investment objective 3 for the next reporting year

Objective 3 for the next reporting year	Establish specific KIPs
Key performance indicators	Using KIPs would allow us to monitor in a more detailed way the improvements made by the portfolio companies

PE 07.2

Describe your organisation's approach to incorporating ESG issues in private equity investment selection. [Optional]

Please find below some examples on how Portobello approaches some of the ESG issues:

Environmental:

Portobello normally completes an environmental Due Diligence to analyse any potential impact from the target investment. This becomes critical if the analysed company carries out any type of industrial activity that involves waste.

In several cases, the outcome of such studies recommended certain actions in order to comply with local regulations, environmental directives or conservation parameters. These recommendations are a priority issue during the first 100 days after the acquisition of the company.

As an example, Portobello analyzed an add-on to our ice cream producer company. Findings in the environmental due diligence were relevant and led to a better understanding of the company and the way it was managed by the owners. The decision was to withdraw from the acquisition process.

Social:

We monitor and verify the supply chain of our portfolio companies (when relevant). These companies request from their suppliers warranties or certificates stating that their businesses support and respect the protection of internationally proclaimed human rights.
