RI TRANSPARENCY REPORT

2013/14

Red Mountain Capital Partners, LLC

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

Red Mountain (the Firm) utilizes a private equity approach to public market investing, driven by value investing principles. We seek to build significant ownership stakes (5-15%) in a concentrated portfolio (10-15 positions) of small cap public companies and seek to actively engage with the management teams of our portfolio companies on a range of initiatives to enhance value. ESG is an integrated part of our investment process. As part of our diligence process for each potential new investment we seek to identify key ESG issues specific to a company or its sector and understand how these risks will/could impact investment outcomes. If the risks are too significant we will either not invest or formulate an engagement plan to mitigate or eliminate these risks.

Based on the concentration of our portfolio, allowing detailed research into company specific issues, we have not found negative screening conducive to achieving our ESG objectives. Due to our bottom-up investment approach, we have not employed a thematic approach to ESG issues historically, but do not rule out the possibility of doing so in the future.
