RI TRANSPARENCY REPORT

2013/14

Régime de Retraite de l'Université de Montréal

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. OA 01.3

Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

The Pension Committee of the University of Montreal Pension Plan (UMPP) adopted its Responsible Investment Policy in 2013. Proxy voting guidelines have been in place since 2006.

The policy is based upon the UMPP's core beliefs regarding responsible investment:

- The UPMM believes that the incorporation of ESG issues in the investment decision-making process provides a more complete and integrated framework for managing investment risks. However, the ESG are one investment criteria and not the sole factor to consider when making investment decisions.
- The UPMM believes that responsible corporate behaviour with respect to ESG factors can generally have a positive influence on long-term financial performance (managing ESG factors proactively enhances companies' long-term performance).
- The UPMM believes it is important for companies to disclose ESG-related information in order to provide investors with appropriate tools to analyze, compare and evaluate these elements across sectors and industries.
- The UPMM considers that the exercise of voting rights, with case-by-case analysis of shareholders resolutions, is an important form of engagement and essential to active ownership.

The UPMM's responsible investment approach is focused on:

- The **integration of ESG issues into the external manager selection** process. The nature and the importance of ESG criteria vary by asset class.
- The **shareholder engagement**, which translates mainly into a systematic exercise of voting rights. UPMM has adopted Proxy voting guidelines, as part of its Investment policy, addressing the areas of corporate governance with respect to which it may be requested to vote on. The Proxy voting guidelines cover five main topics:
 1. Board independence and effectiveness;
 2. Compensation;
 3. Takeover protection;
 4. Shareholders rights;
 5. Social and environmental responsibility - UMPP encourages companies to adhere to and abide by: the UN Universal Declaration of Human Rights, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work and the ILO 8 fundamental Conventions. UMPP also encourages the companies to take appropriate action to protect the environment and to promote sustainable development. The guidelines cite as example of generally accepted principles: the Ceres Principles (Coalition for Environmentally Responsible Economies) and the University of Montreal Environmental Policy.

As for engaging in direct dialogue with the companies, the UMPP prefers cooperating with other institutional investors, signatories of the UN PRI. (/acting as a supporting party of collaborative initiatives led by UN PRI signatories)
