# RI TRANSPARENCY REPORT

## 2013/14

Stichting Pensioenfond ABP

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

The Stichting Pensioenfonds ABP is an independent body with its own Board of Trustees. Social partners, represented by employers and employees, control ABP. They act independently from the organizations they represent and are responsible for ABP's performance. ABP's Members' Council and Employers' Council are bodies with full authorization, incorporating (former) employees and representatives of employers. The Councils give their advice on policy, either at the specific request of the Board, or of their own accord. 'De Nederlandsche Bank' (DNB) is an important external institution that supervises ABP's board. The ABP brand has always been associated with the target group for which it administers the pension scheme. The Board of Trustees made that relationship even more explicit by stating that: ABP exists for the people who serve the public, and the public is all of us.

ABP aims to be a sustainable and dependable pension fund for its participants that is able to meet its financial liabilities now and in the future. The objectives of ABP are:

- to contribute actively to maintaining a sustainable pension system that enjoys broad support;
- to provide an affordable pension that is attractive to young and old and to participants, pensioners, former participants and employers.

ABP will spread the risks inherent in the scheme as fairly as possible over all stakeholders. ABP provides flexibility and individual choice within the collective framework and communicates actively with participants and employers.

To continue working to become a more participant-oriented pension fund, ABP aims to achieve transparency and promote engagement by providing information that really helps participants and employers to make the right pension choices. Communication is not focused exclusively on older people and also seeks to impress upon younger people the importance of a good pension. ABP supports employers in discharging their duty of care to their employees by assisting them with or relieving them of certain tasks. To provide more than pensions alone, ABP offers products and services that support active ageing and actively publicises the flexibility of the pension scheme, thus promoting the continued participation of older participants in the labour market. This is consistent with the long-term strategy to keep the pension scheme affordable. To make the organisation more professional, ABP focuses on specific target groups (public sector and education) and provides good pension fund governance based on accepted principles. ABP ensures that the pension scheme is consistent with the fund's objective of the best possible price/quality ratio.

In 2008 ABP appointed a dedicated discretionary investment manager to manage all our assets. The contractual arrangement is long-term. Therefore, selection and appointment do not happen on a regular basis, although in the initial selection and appointment process we did consider the manager's approach to responsible investing, as well as contractually require the implementation of our Responsible Investment Policy. ABP does, however, regularly monitor the implementation of its Responsible Investment Policy in all of the above asset classes.

ABP feels it has an obligation to achieve the highest possible return for participants. In doing so, we believe that companies with strategies that, in addition to financial return, place a high value on the environment, social factors and good corporate governance will perform better in the long term. We are also aware of the far-reaching influence of our investments and the social responsibility that this implies. The reason for this is the large amount of capital that we invest and our substantial position in the capital market. Consequently, we have chosen to implement a strong Responsible Investment policy. As a long-term investor, ABP places a priority on the long-term goals of the companies in which it invests. Sustainable economic growth, as well as information on environmental, social and corporate governance issues, are all important factors in our investment analysis. These topics are not always covered in a company's financial statements, but they are particularly relevant for a long-term investor such as ABP. We believe that the companies in which we invest must take their stakeholders' interests into account. These include shareholders and other suppliers of capital, employees, customers, suppliers and the environment. We believe that companies must take appropriate account of all these parties in their efforts to earn a profit. If stakeholders act in the same spirit we can create a virtuous circle of responsible business.

Our activities in the area of ESG do not represent a goal in and of themselves. ESG helps us to discharge our primary responsibility by increasing return and lowering risks. We keep implementation of our policy in these areas under constant review. ABP only invests in companies that are expected to be able to guarantee the interests of investors well and for the long term. After all, we are a major investor with liabilities for the long term. Therefore we pursue an active corporate governance policy. This policy sets out our expectations on transparency, independent board membership, accountability and shareholders' rights in the companies in which we invest. Because our equity portfolio is international, we assess the quality of the corporate governance on the basis of international principles and codes, as well as on the basis of the 2009 Dutch Tabaksblad Code (Corporate Governance regulations). Our Corporate Governance Framework sets out in more detail how we implement our corporate governance policy in practice. We aim to exercise our voting rights in respect of the companies in our portfolio via our dedicated investment manager who uses national and international advisory services as input for their analysis. They will frequently attend shareholders' meetings in person in the Netherlands on our behalf in order to communicate views to company boards. The Framework also sets out our approach to legal proceedings. And it explains how ABP deals with securities lending and voting.

ABP starts from the premise that all the companies in which it invests should comply with the United Nations Global Compact. Our investment manager will enter into dialogue with companies if there are indications that this is not the case or if there is room for substantial improvement in areas such as human rights or climate change. If our efforts do not produce the desired result and the company continues to contravene the principles of the UN Global Compact, we will reconsider our investment in it.

ABP does not want to invest in companies involved in products or services prohibited by Dutch or international law. For this reason, we do not invest in companies involved in the production of land mines, cluster bombs, or chemical or biological weapons. After double-checking the information we have, we exclude these companies from our investments.

ABP does not invest in sovereign bonds issued by countries that are subject to an arms embargo by the UN Security Council.

ABP seeks investments that contribute to more sustainable societies by addressing environmental and/or social challenges including climate change, pollution, water scarcity, the loss of habitats and species, education, poverty and socio-demographic trends and

imbalances. ABP's main societal responsibility is to deliver affordable pensions to its clients and their beneficiaries, and hence these investments have to match ABP's risk-return requirements.

## Governance and human resources

<b>OA 07</b>	Voluntary	Descriptive	General
--------------	-----------	-------------	---------

**OA 07.1**

Provide a brief description of your organisation's governance, management structures and processes related to responsible investment.

One of ABP's ten investment beliefs (#9) states that: 'Corporate governance and sustainability matters: The inclusion of sustainability and governance factors in investment decisions improves the risk-return profile.' This belief is reflected in the Strategic Investment Plan and the Responsible Investment Policy. The board of ABP has put in place a Responsible Investment Policy and has delegated the responsibility of implementing the policy to its dedicated investment manager.

The Service Level Agreement between ABP and its investment manager integrates responsible investment requirements. ABP receives monthly and quarterly reports from the investment manager. In addition, ABP conducts periodic in-depth reviews of performance and the policy itself, and members of the ABP Investment Committee and Board receive regular training on ESG matters. The RI policy is supported by further detailed policies. This reflects the remit of our Responsible Investment policy which extends to all asset classes. RI is fully embedded within ABP's investment manager's governance structure. The capital markets CIO of our investment manager chairs the Sustainability & Governance (S&G) Steering Group, which also includes the MD of S&G and four board members, representing risk, legal, alternative investment and clients' concerns. The Steering Group meets on a regular basis to review the implementation of our RI Policy. All relevant RI guidelines and implementation policies also have to be approved by our investment manager's board.

Our investment manager has a dedicated Sustainability & Governance team of nine people in place who work to implement our Responsible Investment Policy across Building Blocks in cooperation with the portfolio managers. ABP relies on its dedicated external manager for the execution of investment-related activities and implementation of its Responsible Investment Policy.

At the investment manager level, for liquid assets, individual investment decisions are made by portfolio managers responsible for specified portfolios - e.g. shares or credits in listed companies in a particular sector. ESG specialists work directly with these portfolio managers to analyse relevant ESG issues and determine their investment implications. For illiquid assets our investment manager uses third party external managers for specialist types of investment in equities and fixed income (bonds), as well as in real estate, infrastructure, commodities, hedge funds and private equity. Our investment manager's ESG team is involved in all decisions to appoint new external managers and signoff on new investment mandates. External managers must be able to demonstrate that they have appropriate policies in place to take account of all relevant ESG issues and report regularly to our investment manager on their performance.

Amongst other activities:

- For our quant portfolio, our investment manager has spent considerable time researching corporate governance indicators to statistically test their impact on long-term stock returns. The research identified a distinction between indicators focused on corporate policy and those focused on corporate behaviour (words vs. actions), with the latter being more correlated with returns than the former. A few indicators were found to be statistically significant and a number of methods are currently being considered to systematically incorporate them into an investment strategy.
- Our investment manager monitors its so-called High Sustainability investments, which are investments in sustainable and renewable energy (wind, solar, hydropower, and bio-energy), waste-to-energy-plants, schools, green buildings and microfinance.
- Our dedicated investment manager is a founding member of the Global Real Estate Sustainability Benchmark and has made participation and the achievement of above average performance within 3 years [after the investment] a condition of investment in non-listed real estate.

## Overview

<b>SAM 01</b>	<b>Voluntary</b>	<b>Descriptive</b>	<b>PRI 1-6</b>
---------------	------------------	--------------------	----------------

**SAM 01.1**

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

ABP has appointed APG Asset Management N.V. (APG) as its asset manager. Before 2008 ABP and the APG organisation were one. Due to regulation from the supervisor, ABP outsourced the active asset management and pension undertakings by way of a long term mandate to APG of which ABP is a shareholder. The mandate fully reflects ABP's Responsible Investment (RI) Policy. Further, we review the RI policy and its implementation on a regular basis. APG is responsible for the implementation of the policy in both its directly and externally managed assets.

<b>SAM 05.4</b>	Additional information. [Optional]
-----------------	------------------------------------

Our investment manager has both directly managed and externally managed assets in its portfolio.

With regard to voting at shareholders' meetings of listed holdings, our investment manager will cast the votes on ABP's behalf. In general our investment manager will vote all Listed Equity holdings, including externally managed assets, itself and values input from their external managers on voting matters.

Our investment manager performs all engagement itself. On at least 2 occasions in 2013 our investment manager asked external managers to reach out to companies in which they have a position (on behalf of us) to address specific ESG issues. Our investment manager stimulates the external managers to develop their own engagement activities and raise E,S and G issues with companies. Especially in Emerging Markets, our investment manager tries to work together with external managers on (E, S and) Corporate Governance issues to join forces, gain momentum and establish higher standards across the industry.

<b>SAM 08.2</b>	Provide additional information relevant to your organisation's dialogue and monitoring of external managers. [Optional]
-----------------	---

As previously stated, all our assets are managed by our dedicated investment manager, who is tasked with the implementation of our Responsible Investment Policy. Our investment manager would, on our behalf, enter into a dialogue/monitor the third party external managers.

In the due diligence process of all third party external managers our dedicated investment manager asks Listed Equity and Fixed Income Credit managers to provide insight into their approach to RI.

Our investment manager also requires listed equity external managers to participate in an annual review which also includes questions on Responsible Investment (RI). Through this annual questionnaire our investment manager asks the external manager to describe changes in and examples of its RI Policy, industry initiatives and collaboration, governance of RI, integration of ESG issues and engagement activities.

Our dedicated investment manager has developed a methodology which compares the approach to RI of different listed equity external managers to their peers, and with this methodology they can also track improvements from one year to another. In 2013 they have implemented this methodology for the first time. Results of the assessment will be shared with the third party external managers as part of our investment manager's ongoing contact with those external managers. As a result of the annual questionnaire, several external managers have shown interest in working more closely with our dedicated investment manager on improving their RI policies and practices.

<b>SAM 10.2</b>	Provide additional information relevant to your organisation's selection approach for non-listed assets. [Optional]
-----------------	---

ABP does not select asset class specific investments. This is done on our behalf by our dedicated investment manager who is tasked with the implementation of our Responsible Investment Policy. Our investment manager has developed and uses advanced ESG processes to be able to integrate ESG considerations in the investment selection and monitoring for alternative asset classes. ABP therefore relies on its dedicated investment manager to integrate ESG considerations in its selection for non-listed assets. They will also pay attention to the underlying manager's ongoing compliance with its own responsible investment framework. Our investment manager would therefore expect to be informed about any changes to an external manager's RI policies and get an insight as to how these policies are being implemented over the life of the investment.

## Appointment

<b>SAM 11.2</b>	Provide additional information relevant to your organisation's manager appointment process and considerations included in contractual agreements for non-listed assets.
-----------------	---

Our dedicated investment manager is tasked with the implementation of ABP's Responsible Investment Policy for both listed and non-listed assets. They are required to regularly report on policy implementation via monthly and quarterly reports to ABP.

Our investment manager ensures that key ESG requirements for alternative investments (which includes infrastructure, real estate and private equity) are reflected in the contractual arrangements with underlying external managers.

The final form of legal requirements regarding our responsible investment criteria will depend on the individual circumstances of each investment.

## Monitoring

<b>SAM 12</b>	<b>Mandatory</b>	<b>Core Assessed</b>	<b>PRI 1-6</b>
---------------	------------------	----------------------	----------------

<b>SAM 12.1</b>	Indicate whether your organisation, and/or your investment consultant, in the dialogue and monitoring of your external manager, typically do any of the following:
-----------------	--

General
---------

	PE	PR	INF
Include responsible investment as a standard agenda item at performance review meetings	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Highlight examples of good responsible investment practice by other managers	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Other ways ESG issues are incorporated in the pre-investment process, specify	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
None of the above	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

#### Investment monitoring (post-investment) of underlying holding

	PE	PR	INF
Request reports on the ESG characteristics of the manager's underlying holdings and discuss related developments that may impact holdings in the fund	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Request examples of ESG issues identified within the portfolio and action taken in response	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Request details of how ESG factors were considered when preparing to exit from investments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Other ways ESG issues are monitored in the post-investment process, specify	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
None of the above	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

<b>SAM 12.2</b>	Provide additional information relevant to your organisation's dialogue and monitoring of external managers. [Optional]
-----------------	---

As it does not perform the selection of third party external managers itself, ABP relies on its dedicated investment manager to have a dialogue with and monitor third party external managers on behalf of ABP. Relevant ESG topics are frequently a part of our dedicated investment manager's annual review of external managers. If any significant concerns are identified by its Sustainability and Governance Team, they would jointly with their responsible internal investment professionals engage with the third party external manager.

## Other asset classes

<b>SAM 13</b>	Voluntary	Descriptive	PRI 1-6
---------------	-----------	-------------	---------

<b>SAM 13.1</b>	Describe how your organisation, and/or your investment consultants, address responsible investment factors in manager selection, appointment and/or monitoring process for the following asset classes:
-----------------	---

Asset Class	Description
Commodities	<p>In the commodities portfolio, investments are made directly or indirectly via funds in unlisted companies with operations in the fields of forestry, agriculture, mining, and oil and gas exploration and production. Our investment manager has a set of internal ESG guidelines for natural resource investments which include asset-specific due diligence questions. It sets high demands on the ESG performance of these companies as well the supervision of that performance by the funds in which we invest. For example, there is a requirement for all the funds investing in mining and oil and gas production in emerging markets to agree contractually to adhere to working procedures in accordance with internationally accepted guidelines. Specifically, this concerns the IFC (International Finance Corporation) Performance Standards on Environmental and Social Sustainability as well as the World Bank Group's environmental, health and safety guidelines for mining and oil and gas production (the so-called EHS guidelines).</p> <p>Moreover, each investment in this portfolio is dependent on approval by our investment manager's S&amp;G Team. Its portfolio managers furthermore regularly visit investment projects in the commodities portfolio. These visits serve to ensure that, among other things, the ESG performance of the investments can be properly assessed.</p>
Farmland	<p>In the commodities portfolio, investments are made directly or indirectly via funds in unlisted companies with operations in the fields of forestry, agriculture, mining, and oil and gas exploration and production. Our investment manager has a set of internal ESG guidelines for natural resource investments which include asset-specific due diligence questions. It sets high demands on the ESG performance of these companies as well the supervision of that performance by the funds in which we invest. For example, there is a requirement for all the funds investing in mining and oil and gas production in emerging markets to agree contractually to adhere to working procedures in accordance with internationally accepted guidelines. Specifically, this concerns the IFC (International Finance Corporation) Performance Standards on Environmental and Social Sustainability as well as the World Bank Group's environmental, health and safety guidelines for mining and oil and gas production (the so-called EHS guidelines).</p> <p>Moreover, each investment in this portfolio is dependent on approval by our investment manager's S&amp;G Team. Its portfolio managers furthermore regularly visit investment projects in the commodities portfolio. These visits serve to ensure that, among other things, the ESG performance of the investments can be properly assessed.</p> <p>In the field of agriculture, our investment manager not only reviews and judges our investments on ESG factors, but also makes a contribution to the development of the standards for investing in agricultural land. Working together with other institutional investors we have been instrumental in drawing up the Principles for Responsible Investment in Farmland, with the aim of improving sustainability, transparency and accountability in this area.</p>
Forestry	<p>We invest in forestry funds via our commodities portfolio. In addition to all the standard ESG requirements for all investments in the commodities asset class, our investment manager requires external managers investing in timber assets to operate in accordance with a sustainable forestry certification scheme (such as the FSC or equivalent). If not in place such certification needs to be sought in order for us to invest. Sustainable forestry certification schemes usually include requirements regarding greenhouse gas emissions, harvesting methods, genetically modified organisms, maintaining soil fertility and the use of agricultural chemicals.</p>
Hedge funds	<p>Hedge funds are investment funds that apply a wide variety of strategies in order to achieve returns on the financial markets. Our investment manager screens investments in hedge funds in terms of ESG aspects, with the S&amp;G team having an important say in the assessment of the funds. Our investment manager's S&amp;G Team is consequently closely involved with the assessment of all new investment proposals. The analysis by the S&amp;G team is moreover evaluated by an internal investment committee. We chaired a working group of global investors with the aim of developing guidelines for hedge funds with regard to responsible investment and transparency. This resulted in the publication of a discussion document by the UN PRI that serves as a guideline for institutional investors when selecting and monitoring</p>

	their hedge fund managers.

<b>SAM 13.2</b>	Additional information.
-----------------	-------------------------

ABP does not directly engage in the selection process of third party external managers. This is done on our behalf by our dedicated investment manager.

The basic manager selection, appointment and/or monitoring process used by our investment manager is the same for all of the above asset classes and takes ESG considerations into account, including a mandatory ESG sign-off process.

Our investment manager also has separate responsible investment implementation guidelines for hedge funds and commodities (this includes forestry). In addition, it has developed guidance on Unconventional Gas Operations for external managers.

ABP expects High Sustainability Investments in all asset classes, including the above, to be reported by our investment manager.

External managers of real estate have to agree to the following conditions, which are included in the legal documentation:

- Participation of the investment in the annual GRESB-survey for the full holding period of our investment; and
- To the extent that the investment has not yet achieved above average sustainability performance (i.e. outperforming 50% of the peer group in the GRESB benchmark), the manager agrees to work in good faith with our investment manager to identify and to implement agreed upon strategies designed to achieve the required outperformance within three years' time.

Our investment manager actively promotes our responsible investment policy in order to promote sustainability and corporate governance. They work with other asset managers and pension funds around the world to increase the impact of our Responsible Investment policy and communicate actively about these activities, including our High Sustainability Investments (HSI), which take into account investments in inclusive finance. HSI include investments in sustainable energy, drinking water and waste water purification, waste disposal, micro credit, schools, and hospitals. We therefore consider inclusive finance to be part of the HSI portfolio.
