RI TRANSPARENCY REPORT

2013/14

Stichting Pensioenfonds Zorg en Welzijn

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Introduction

In June 2013 the Board of Stichting Pensioenfondsen Zorg en Welzijn, hereinafter referred to as PFZW or the pension fund, adopted a new investment framework for the period 2013-2020. This investment framework is intended to result in investments which are focused on efficient achievement of the pension ambition (in order to be able to pay out an income-linked pension). They must also have sustainability integrated within them and be comprehensible and controllable.

PFZW has chosen to integrate sustainability firmly within this investment framework. The new investment framework therefore provides the guidelines for a revision of PFZW's responsible investment policy. This document describes PFZW's enhanced vision of responsible investment, which will take several years to implement.

Responsible investment.

PFZW sees responsible investment as the means to integrate sustainability. PFZW seeks to achieve this by making choices with regard to investments and the way in which the pension fund acts as a player at the beginning of the financial chain, as well as through other responsible investment activities described in this document.

The implementation of responsible investment has largely been outsourced to the asset manager. PFZW's responsible investment policy provides an umbrella and sets the framework for implementation by the asset manager.

Beliefs

PFZW's responsible investment policy is based on the following convictions with regard to PFZW's role and responsibility:

PFZW assumes responsibility to help build an inhabitable and more sustainable world in which participants receive their pension.

PFZW's primary responsibility is to ensure a high-quality, stable pension for participants, now and in the future. PFZW thus acknowledges its broader responsibility to help build an inhabitable and more sustainable world in which participants receive this pension. A good pension ultimately has greater value in a world that is fit to live in.

PFZW can contribute to a more sustainable world by harnessing the driving force of money.

The large amount of capital entrusted to PFZW has a huge social impact. That creates potential but also entails responsibilities. By managing the capital in a targeted way, PFZW can stimulate a positive contribution to a viable world and minimise any negative impact.

A sustainable, inhabitable world is necessary to generate sufficient returns in the long term.

The way in which the world has been treated in past decades is no longer viable. It has led to fragile social, ecological, financial and economic systems. PFZW firmly believes that this will impact future investment results. In order to fulfil our pension ambition, both now and in the future, we must exercise greater care in handling the ultimately scarce resources for economic growth, such as raw materials, people and capital.

Integrating sustainability contributes to more responsible, more stable and fundamentally

comparable investment results.

On the basis of conclusions drawn from a growing number of surveys, PFZW firmly believes that sustainability factors increasingly have a material impact on the risk-return profile of investments. Integrating sustainability in the investment policy contributes to returns over the long term.
