RI TRANSPARENCY REPORT

2013/14

Truffle Capital

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. While this information is believed to be reliable, no representations or warranties are made as to its accuracy and no responsibility or liability can be accepted for any error or omission.

At Truffle Capital we value all our stakeholders and we understand their importance in making projects and investments successful.

We do our best to invest in companies developing projects / products that correspond to real market needs.

In the energy sector: we seek to make energy-conscious investments in technologies that will enhance production for big energy producers. We concentrate our investments on the following areas: energy efficiency, energy management, new technologies for traditional energies and renewable energies (wind, hydro, solar, geothermal, biomass, biogas, biofuels).

In the Information Technology: we concentrate on the following areas in Information Technology: mobile content and connectivity, Internet, technical software, IT security, and VOIP, and technologies that would improve the quality of life and correspond to an unmet market demand.

The Life Science sector focuses on three areas: therapeutic drugs and vaccines, medical devices. We support companies which develop breakthrough technologies that can significantly improve patients' lives.

Responsible Investment Philosophy:

As a long-term investor, we're patient and persistent in working with our portfolio companies to build trust and develop mutual understanding. We aim at majority or at least influential stakes in companies we invest, in order to become a strategic partner and avoid speculative investments.

Our commitment towards our portfolio companies:

Providing them with strategic guidance, as well as financial support, to help them become leaders in their respective sectors.

Investing over the long term and adding sustainable value.

As a strategic investor, we seat as a board member in every portfolio companies. Our active ownership involves using our formal rights at the board of directors' level to encourage companies to improve their management systems, their ESG performance and their reporting.

We favorably invest in companies with better governance and management processes and ESG performance. But if this is not the case, we promote best practices in this field by:

- building an independent supervisory/scientific committee to bring adding independent directors to the boards to ensure the protection of the interests of all shareholders.
- setting up compensation committee to motivate the management and align all the interests from the investor to the staff of the company.
- creating audit committees for listed companies
