RI TRANSPARENCY REPORT

2013/14

UniSuper Management Pty Limited

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. OO 06.2 Additional information. [Optional]

UniSuper invests across a range of asset classes, and has a major focus on equities and fixed income. While UniSuper has some exposure to private equity, it has, over the last 4 years sought to sell down and continually reduce its private equity exposure. We do not believe the returns justify the fees and also have governance concerns regarding PE. Likewise, UniSuper has never invested in hedge funds - key reasons include the opaque nature of hedge funds, difficulty in assessing governance practices, the high fees and our lack of comfort with the risk/return profile of hedge funds.

OO 09	Voluntary	Descriptive	General
--------------	------------------	--------------------	----------------

OO 09.1

Provide any additional information about your organisation, its mission, strategies, activities or investments which are important to contextualise your responsible investment activities.

UniSuper is the superannuation fund for Australia's higher education, university and research sector, and takes seriously the responsibility it has for managing its members' retirement savings.

UniSuper has 450,000 members who are highly engaged and focused on their superannuation and ESG issues more broadly.

Strong investment governance processes and a disciplined approach to looking at risk and return guide UniSuper in all investment decisions. Furthermore, UniSuper is managed in accordance with the best interests of all members and is overseen by an experienced Trustee Board on which there are three independent directors, in addition to the member and employer nominated director.

In managing investment risk, we seek to mainstream ESG considerations across all of our investments (where appropriate and possible to do so) and we also offer 3 specifically themed products to our members (two SRI options and a Global Environmental Opportunities option).

We do not generally adopt a screening approach to ESG / responsible investing, rather, we focus on integration and being an active owner. However, in 2011 we took the decision exclude tobacco from our entire investment portfolio, given our concerns over the sustainability of the tobacco industry. We were the second fund in Australia to do so.

OO 10.1

Select the responsible investment activities your organisation implemented, directly and/or indirectly, for listed equities in the reporting year.

- We incorporate ESG issues into investment decisions on our internally managed assets
- We address ESG incorporation, engagement and/or (proxy) voting in our external manager selection, appointment and/or monitoring processes
- We engage with companies on ESG issues via our staff, collaborations or service providers
- We cast our (proxy) votes directly or via service providers
- None of the above

OO 10.3 Additional information. [Optional]

UniSuper adopts a three pillared approach to integrating ESG into its investment processes and to being a responsible investor. UniSuper:

1. Is an active owner - we vote and we engage with companies in which we are invested
2. Undertakes investment specific ESG activities - e.g. include ESG in our stock templates, consider and discuss ESG as part of our stock selection decisions, review our external fund managers' approach to ESG
3. Collaborate with others - we work with other investors and within industry groups to achieve positive ESG/responsible investment outcomes

OA 01.2 Indicate if you have other guidance documents or more specific policies related to responsible investment.

- Yes
- No

OA 01.3

Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

The policies that we currently have in place were first drafted in 2007. We have prepared a new overarching policy (drafted in Nov 2013) which is pending final approval. Our policies relate to corporate governance and sustainable investing and apply to all asset classes. We also have a range of ESG information available on our website and we prepare a six monthly Responsible Investment report, which is also available on our website.

Due to our asset class mix, our main ESG / Responsible Investment focus to date has been on our equity exposure as this is where the vast majority of funds are invested.

We are currently assessing how to be more active with regard to fixed income and we undertake a range of activities on our property and infrastructure investments, however, these tend to be issue based and more ad hoc than with our equities ESG activities. For example, we conduct ESG due diligence when considering whether to acquire an infrastructure asset (however, we make such acquisitions infrequently, e.g. every 2-3 years).

In making investments, we see ourselves as entering into a long term partnership with the entity in which we are investing and we apply a 'quality' overlay to our investment approach in that with every investment we:

- Recognise that we are responsible for managing our members' life savings
- Apply a disciplined approach at looking at risk and return
- Have a preference for quality companies at sensible valuations

We look for strong assets that are 'fortress' like in competitive industry positions, with strong fundamentals and with asset valuations that make sense.

ESG and responsible investing is strongly tied to this and we always seek to be commercial and pragmatic in our approach, and in summary:

1. We seek to be an active share owner
2. We seek to integrate ESG (identify the risks and manage them where possible)
3. We collaborate with others
4. We offer SRI and Environmental themed investment options to our members
5. In very limited circumstances we screen out sectors (Tobacco)

Our Investment Procedures Manual specifically makes provision in relation to conflicts of interest and their management. The Investment Committee (IC) is charged with overseeing conflict of interest management in UniSuper's investment process and the IC must comply with the IC code of conduct. All IC members and investment staff are required to maintain a register of personal interests.

Internally - UniSuper has a securities trading policy and approval process in place - "UniSuper Restricted Securities Trading Policy". Investment staff are not allowed to accept any gifts and may only accept some forms of entertainment and only in certain circumstances.

Externally - UniSuper includes clauses in the Investment Management Agreements regarding conflict of interest management. Our investment managers are required to manage material sources of conflict in accordance with their own or industry codes of practice.

OA 05.4 Additional information. [Optional]

Each year we assess what the key areas of ESG/Responsible Investment focus will be. Throughout the year we then assess how we have progressed.

However, the area of ESG/Responsible Investment is such that many issues materialise throughout the year and will attract specific attention and focus. It is not possible to pre-empt what these matters will be and therefore it is not possible to specifically include them in the objective and goal setting process.

OA 06	Voluntary	Descriptive	General
--------------	------------------	--------------------	----------------

OA 06.1 List your three main responsible investment objectives you had set for the reporting year. For each, indicate any key performance indicators you set to measure your progress and also indicate your progress towards achieving your objectives.

Add responsible investment objective 1

Objective 1	Update the ESG policy documents
Key performance indicators	Preparation of a new revised policy document
Describe the progress achieved	Final approval is being sought

Add responsible investment objective 2

Objective 2	Increase the levels of engagement with investee companies
Key performance indicators	Increased number of meetings with companies, and in particular with company Chairmen / Directors (in addition to senior management)
Describe the progress achieved	UniSuper, year on year continues to directly meet with higher numbers of companies. We also contact all Australian companies where we vote AGAINST AGM resolutions.

Add responsible investment objective 3

Objective 3	Have an independent safety review conducted at one of our unlisted timber investments
Key performance indicators	A safety review has been completed
Describe the progress achieved	The safety review has been completed and board subcommittee has been put in place to oversee safety and governance at the relevant asset in question.

OA 06.2	List your three main objectives for responsible investment implementation for the next reporting year and indicate any key performance indicators you intend to use to measure your progress.
----------------	---

Add responsible investment objective 1 for the next reporting year

Objective 1 for the next reporting year	Consider conducting climate risk analysis of our listed equity portfolio
Key performance indicators	A completed climate risk assessment

Add responsible investment objective 2 for the next reporting year

Objective 2 for the next reporting year	Increase the the level of ESG focus on international companies
Key performance indicators	Increased levels of ESG engagement with international companies

Add responsible investment objective 3 for the next reporting year

Objective 3 for the next reporting year	Continue our dialogue with equities fund managers and focus more on fixed income
Key performance indicators	Develop clearer ESG approach regarding fixed income

OA 06.3	Additional information.
----------------	-------------------------

While it is possible to set objectives regarding ESG, our main focus is always on being an active owner and seeking to identify appropriate opportunities to further consider ESG. We do not adopt a prescriptive objective setting approach as this can result in an inability to respond and adapt to situations and issues as and when they arise.

Governance and human resources

OA 07	Voluntary	Descriptive	General
--------------	-----------	-------------	---------

OA 07.1	Provide a brief description of your organisation's governance, management structures and processes related to responsible investment.
----------------	---

Our Chief Investment Officer provides primary oversight. Some matters are raised at the Investment Committee and Board level. However, as a matter of practice, ESG / Responsible Investing is part of our day to day investment management practices. We believe this is an administratively efficient way of implementing ESG.

Under our CIO there are asset class "Heads of" - who then oversee the management of their asset classes with their respective teams.

The Manager, Governance and Sustainable Investments and one of our Senior Investment Analysts support the implementation of ESG/Responsible Investing across the asset classes.

Consideration of ESG and the integration of ESG occurs across all levels of the investment team and is a matter that all people in the investment team are focused on.

UniSuper's members, who come from the higher education and research sector, are highly engaged regarding ESG issues. We seek to communicate with our members regarding ESG related issues. This includes webinars, investment updates, the preparation of a six monthly responsible investment reports and discussion of ESG issues at member seminars. We also receive high levels of member queries regarding specific ESG issues and we therefore spend significant amounts of time investigating the issues raised and transparently responding to these queries.

----------------	-------------------------

As mentioned previously, UniSuper applies a "quality" overlay to its investment approach. As a consequence we tend to have a very low level of investment in emerging markets and no exposure to frontier markets, where ESG practices tend to be lower than in developed markets.

ESG considerations do not specifically inform our approach to strategic asset allocation. Our SAA is prepared using econometric modelling which considers returns, the relationship of returns between asset classes and the volatility of returns and then looks at all of these matters in relation to the fund's pension liabilities. We are still not yet clear on how ESG would form part of our SAA process because we are not targeting ESG themed investments as part of our SAA and we believe it is difficult to mathematise ESG.

We therefore seek to integrate and apply ESG considerations as a qualitative common sense overlay.

OA 15.1	Describe how you address ESG issues for internally managed assets for which a specific PRI asset class module has yet to be developed or for which you are not required to report because your assets are below the minimum threshold.
----------------	--

Asset Class	Describe what processes are in place and the outputs or outcomes achieved
Fixed income - corporate	<p>Our approach to incorporating ESG into our fixed income portfolio is evolving. It is a matter that we consider, but unlike equities, it is less clear to us as to the best approach to adopt.</p> <p>As it currently stands, we:</p> <ul style="list-style-type: none"> > Screen tobacco. > Do not invest in frontier markets. We only invest in developed market corporate debt issued either by Australian companies or global companies with operations in Australia and in Australian currency. > When buying such corporate debt we apply a common sense ESG overlay and assess the ESG risks associated with the specific company in question. <p>As it currently stands, we believe the companies in the portfolio have low levels of intrinsic ESG risk.</p>
Fixed income - government	<p>We only invest in Australian Government debt. Therefore, we do not apply any country screens.</p> <p>Again, there is a low level of intrinsic ESG risk. We are not investing in the sovereign debt of countries with egregious social and environmental practices.</p> <p>We do not believe there is much we could do regarding ESG from an Australian Government debt perspective.</p>
Property	<p>We invest in direct office and industrial property. The managers in place have strong ESG attributes and credentials - e.g. AMP, Lend Lease, GPT.</p> <p>We focus on quality assets with NABERS and / or GreenStar ratings. The property managers report on a broad range of ESG metrics, e.g. water, waste and energy consumption.</p> <p>We also have a strong focus on risk management, OHS and corporate governance. e.g. independent directors and investor committee. Consequently we have a high level of engagement regarding governance matters.</p> <p>Our property managers also have a high level of engagement with tenants regarding ESG matters.</p> <p>We consider the ESG characteristics associated with new investments and monitor managers in regard to their ESG performance.</p>
Infrastructure	<p>UniSuper has substantial investments in a number of major infrastructure assets. These assets include the Victorian Desalination Plant (an asset important to ensuring Victoria's water supply), the Victorian Comprehensive Cancer Centre (a critical piece of social infrastructure) and transportation (airports and toll roads). We tend to focus on equity investments in infrastructure and take a significant minority stake.</p> <p>Acquisition - We do not routinely acquire infrastructure, however, when we do, we conduct ESG due diligence as part of the due diligence process. We identify what ESG risks are present, the materiality of those risks, how those risks will be managed (via management plans, contractual clauses etc) and then make an assessment of whether we are comfortable with those risks.</p> <p>In making infrastructure investments we focus on ensuring there is a quality board in place,</p>

	<p>quality management teams and the quality of the overall environmental and social management practices.</p> <p>Asset management - UniSuper, where it has the right to do so appoints nominee directors to the boards of the infrastructure assets in which it is invested. These directors maintain direct line of sight and provide oversight the ESG issues arising at those assets.</p> <p>In 2011 we conducted a study (internally) of how our unlisted infrastructure and property assets were positioned with regard to climate change.</p> <p>In appointing third party operators we consider ESG issues and particularly community, safety and environmental management practices.</p> <p>We do not seek to obtain formal ESG/sustainability reports from the asset manager, we believe this is covered off by our nominee directors and their role on the board.</p>
Forestry	<p>UniSuper holds investments in a number of forestry assets in Australia and New Zealand. These are long standing investments and we have not made any acquisitions in a number of years.</p> <p>Asset management - UniSuper has the right to appoint nominee directors to the boards of the timber assets we are invested in. These directors maintain direct line of sight and provide oversight the ESG issues arising at those assets. They also report back to Unisuper management regarding key ESG issues and risks.</p> <p>In 2013 we had specific concerns around occupational health and safety practices. Accordingly we raised these issues with our nominee directors who took these issues to the board on our behalf. As a consequence of us working with our nominee directors we were successful in having a strategic organisational OHS review conducted at the entity in question and in having a governance board sub committee established. We were very active in raising an issue and ensuring that it was focused on and addressed.</p>

OA 15.2	Additional information.
----------------	-------------------------

The vast majority of our investments are in equities and fixed interest and this is where much of our time focused on ESG is spent. However, we do focus on ESG more broadly across all investments and it is a matter which is in many instances addressed on a case by case basis as is evidenced in our approach to timber or infrastructure.

Innovation

OA 18

Voluntary

Descriptive

General

UniSuper places great importance on being a responsible investor. In doing so, we are an active owner, we seek to incorporate ESG into the investment decision making process and we seek to collaborate, as well as also sharing our learnings both with our members and also more broadly.

In addition to this, we believe it is important to recognise that:

> UniSuper's approach to ESG and Responsible Investing is to adopt a logical and incremental process and we only take action where we believe it is of benefit to our members.

> UniSuper has a focus on "quality" assets at the right price. These tend to be assets with strong competitive positions within given industries, in which we take substantial positions in and hold for the long term. In doing so, we view ourselves as being in partnership with the company and believe that building an ongoing respectful relationship is critical. We actively seek out company management and the board and vice versa to discuss all issues of concern and our expectations. In doing so, we also highlight to those companies (and others that we engage with) what issues are of concern to our members. This is an on-going process of engagement.

More broadly, in the Australian marketplace we have been proactive in contacting companies to engage with directly. In 2011 we first wrote to all ASX 100 companies introducing ourselves and requesting that companies include us on their investor and board roadshows. Since that time we have had increasing levels of company engagement. We still seek out companies to speak to, but they also seek us out and want to know what our views on issues are.

> We do not currently screen out fossil fuels. However, we provide our members with the ability to invest in a Global Environmental Opportunities Option which excludes fossil fuels and focuses on companies that are involved in clean energy, energy efficiency, clean water, green buildings and pollution control. We are also actively looking at how else we can best meet our members' needs and expectations regarding fossil fuel investments.

> We are increasingly internalising management of our members' assets (currently 47% of assets under management are managed internally). This enables greater ESG insight and control.

> With regard to international equities, we increasingly take positions via specific sectors (e.g. Technology, Healthcare, Infrastructure) and via specific regions (e.g. Japan). This differs from many other superannuation and pension funds which primarily invest via broad global share mandates.

SAM 01.1

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

- > UniSuper has, for a number of years, included ESG as part of its manager selection, appointment and monitoring process.
- > We do not use an asset consultant and we meet with many managers looking to win mandates from UniSuper. In meeting with these managers we always ask them about their ESG process and approach
- > When appointing a manager we ask them about their ESG process and approach and to provide relevant documentation to us
- > When conducting annual incumbent manager reviews, ESG is a formal part of this review process
- > Initially every year, and now every two years, we ask managers to provide detailed responses to a range of ESG related questions so that we can track ESG progress, performance and highlights
- > On an ad hoc basis (multiple times per year) we will pose specific ESG questions of our managers on topical issues both to inform us of their approach and thinking but also as a way of gauging how deeply they are thinking about ESG issues

Additional information. [Optional]

UniSuper has long believed in the importance of limiting intermediation in the investment supply chain consistent with the findings of the 2012 Kay Report.

Consequently, UniSuper does not use an asset consultant in making manager appointments and only utilises asset consultant information on an ad hoc basis. All manager selection and reviews are conducted by UniSuper's internal investment team. This limits the costs to our members and also ensures that we maintain direct oversight of our fund managers.

Themed investments:

Please note -

> We seek to mainstream ESG into our investment practices and processes and to identify and manage ESG risks. We do not target ESG themed investments.

> We do not typically screen sectors from our portfolio. However, UniSuper was one of the first Australian funds to screen tobacco entirely from its investment portfolio. We did so in mid 2012.

> However, to cater to member choice we do offer themed investment options that members may opt into (namely a Global Environmental Opportunities Option and two SRI options). These are both passively managed.

- > We encourage our managers to collaborate with us. We do not encourage them to collaborate more broadly. It is a matter entirely up to them and their investment processes.
- > In almost all manager meetings we discuss ESG issues, both specific issues, but also to obtain an understanding of how fund managers consider ESG as part of their investment process
- > On an ad hoc basis, we will send information requests to managers, regarding specific ESG issues and ask for their analysis / views - this is a good way of testing them in reality and how they are thinking about live issues
- > With regarding to proxy voting, we will frequently engage with our managers regarding their voting intentions and to understand how they are thinking about the issues
- > With regard to engagements we do not review comprehensiveness (this will often be clear in talking with them about their engagement activities) nor do we assess whether they had a leading or supporting role. In our view, the importance of engagement stems from building a relationship with the investee company and having an open dialogue. In some instances it may lead to change, but importantly it leads to greater mutual understanding and also to companies understanding that investors are focused on ESG issues and that they are of importance to investors.
- > We do not view filing of ESG resolutions as being indicative of good ESG practice and therefore do not focus on this.

Overview

LEI 02	Voluntary	Descriptive	PRI 1
LEI 02.1	Provide a brief overview of how you incorporate ESG issues in listed equity investments.		

In managing our internal listed equity exposure we adopt a common sense ESG overlay. In doing so, we seek to understand what we are investing in, what risks (including ESG risks) are present and to then establish whether we are comfortable with those risks.

We only invest in developed market companies and have a strong focus on quality - quality companies, quality management, and strong balance sheets.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

Screening:

> We screen out tobacco

Integration:

> We seek to integrate ESG considerations across all investments. We are a mainstream investor (therefore we are not focused on thematic ESG plays) and seek to ensure that we understand all risks (including ESG risks) facing our investments.

> This goes to ensuring well informed investment decisions and enables us to engage with companies regarding issues of significance or concern.

Additional information.

We rely on a range of information sources and data points. We are also currently in the process of looking at ESG research providers and are hoping to appoint one shortly.

The investments team at UniSuper is highly integrated and very focused on ESG. Consequently, ESG related information is disseminated quickly and investigated where deemed necessary. Likewise, we also maintain close relationships with our fund managers, industry groups, specialist analysts and sell side brokers who pro-actively provide us with ESG related information in a timely manner.

We integrate ESG into our investment decision making process using a qualitative overlay. We do not seek, at this point, to value ESG risks or to underweight/overweight stocks based on ESG issues. Rather, we construct the portfolio and in doing so look at the risks present and consider whether based on the stocks selected we are comfortable with the ESG risks present. I.e. we validate the stock selection decisions using ESG as a check.

> We are constantly seeking to remain abreast of key ESG issues and how they impact our portfolio

> In doing so, we are constantly reviewing a range of materials and information sources to identify ESG issues and risks that we need to look at further and consider as part of our investment decision making process

> When we identify any issues we discuss these as a team and we also engage with the company in question, our external managers that hold the stock and the sell side brokers that research the stock. This enables us to better and more comprehensively understand whether we are comfortable with the risks associated with owning the stock. It also ensures we build a relationship through dialogue with key intermediaries in the investment supply chain, and the investee company

Engagement

Overview

LEA 01	Voluntary	Descriptive	PRI 2
LEA 01.1	Provide a brief overview of your organisation's approach to engagement.		

UniSuper has a comprehensive approach to engagement. We believe being an active owner is central to ESG. In terms of engagement, we:

- Engage directly with company chairmen, directors, CEOs and other senior executives of the companies in which we are invested. In doing so, we are seeking to build a long term relationship which centres around open dialogue. More often than not we are not seeking to drive change. Rather, we are seeking to better understand key business drivers, the issues and how the company manages them. In some instances we may voice concern, however that is not always the case. We also seek to clearly communicate that we see ourselves as a responsible shareowner and that our members also take ESG very seriously and accordingly it is critical to us that the companies in which we are invested manage ESG issues material to their business operations.

- Engage via ACSI. Engagement with ASX200 companies on a range of ESG investment risks is undertaken through membership of the Australian Council of Superannuation Investors (ACSI). ACSI is a collaborative membership organization of 38 superannuation funds, representing more than AUD\$400 billion in assets under management.

- IGCC also engage on our behalf

- We engage with our peers, both domestically and internationally. We seek to share our learnings and to learn from our peers.

UniSuper is constantly attuned to the need to remain abreast of key issues which may require engagement. We are therefore constantly reviewing a range of information sources to identify if and when engagement may be necessary.

We have company chairmen and CEO's coming in to meet with our portfolio managers routinely throughout the year. Typically our Manager, Governance and Sustainable Investment (GSI) will attend these meetings and the ESG engagement forms part of every meeting that we have. Where the Manger GSI is not present, she will flag key ESG issues to be raised with the company.

In addition to this, there are specific issues that we have raised with some companies as and when we believe it is necessary to do so.

We also engage with companies around proxy voting season to understand the issues coming up and to share our views.

Topic or ESG issue	Anti bribery and corruption
Conducted by	<input type="checkbox"/> Individual / Internal <input type="checkbox"/> Collaborative <input checked="" type="checkbox"/> Service provider
Objectives	Enhanced company disclosure of anti-corruption policies as per ICGN framework.
Scope and Process	<p>ACSI engaged with eight companies identified via commissioned research to have poor anti-corruption disclosure relative to risk exposure.</p> <p>Letters were written to companies, followed by either further written correspondence or face to face meetings.</p>
Outcomes	Five of the eight companies responded to ACSI: two have published improved anti-corruption policies, one is completing an internal review and two are discussing the issue with the board. The remaining three companies have not responded and engagement has continued in conjunction with the PRI Anti-Corruption working group.

Add Example 4

Topic or ESG issue	Sustainability reporting
Conducted by	<input type="checkbox"/> Individual / Internal <input type="checkbox"/> Collaborative <input checked="" type="checkbox"/> Service provider
Objectives	Improved annual reporting of ESG risks.
Scope and Process	<p>63 companies identified through ACSI's research to have basic or no reporting on ESG risks in annual disclosures.</p> <p>Letters written to each company detailing areas that require improvement and providing guidance on disclosure frameworks.</p>
Outcomes	<p>ACSI wrote to all companies considered to have provided either limited or no sustainability reporting within their company disclosures.</p> <p>Each letter detailed the company's current level of reporting relative to market standards, encouraging improvement and an insight into investor expectations on ESG disclosures.</p> <p>Ten companies were prioritized for further engagement in 2013 given their low level of reporting and the ESG issues associated with their operations (e.g. mining and heavy industry). Two of these companies have already improved their reporting practices.</p>

Add Example 5

Topic or ESG issue	Labour & Human Rights Policies
Conducted by	<input type="checkbox"/> Individual / Internal <input type="checkbox"/> Collaborative <input checked="" type="checkbox"/> Service provider
Objectives	Enhanced company disclosure of Labour and Human Rights policies.
Scope and Process	<p>ACSI engaged with 13 companies identified via two commissioned research reports for high exposure to labour and human rights risks with relatively low disclosure of policy.</p> <p>Letters were written to companies, followed by either further written correspondence or face to face meetings.</p>
Outcomes	<p>Four companies responded with information regarding further initiatives being undertaken in this area or extension of policies. One company requested further guidance.</p> <p>Six companies did not respond. Further engagement correspondence has been undertaken and the companies are now reviewing the second letters internally.</p> <p>One company has advised it does not have issues in this area.</p> <p>One company has provided no response or acknowledgment. The issue is due to be addressed in continued dialogue in 2014 and beyond.</p>

(Proxy) voting and shareholder resolutions

Overview

LEA 16

Voluntary

Descriptive

PRI 2

LEA 16.1	Provide a brief overview of your organisation's approach to (proxy) voting (including the filing and/or co-filing of shareholder resolutions if applicable).
-----------------	--

Externally managed:

With regard to externally managed portfolios, it is required by our IMAs that managers vote their portfolios. We see this as being part of how they manage their investments. However, we retain the right to instruct them on how to vote / override their voting decisions. We frequently exercise this right and increasingly so.

Internally managed:

Domestically:

With regard to internally managed portfolios UniSuper obtains ACSI proxy voting advice, reviews it (and a range of other inputs), including discussions with specialist analysts and fund managers), draws upon its own external knowledge and expertise and then decides how it will vote.

Internationally:

With regard to internally managed portfolios, PIRC provides voting advice and executes the votes for UniSuper.

Approach

- We use our own research or voting team and make our own voting decisions without the use of service providers.
- We hire service provider(s) which make voting recommendations or provide research that we use to inform our voting decisions.

Based primarily on

- the service provider voting policy signed off by us
- our own voting policy
- our clients requests or policy
- other, explain
- We hire service provider(s) which make voting decisions on our behalf, except for some pre-defined scenarios for which we review and make voting decisions.
- We hire service provider(s) which make voting decisions on our behalf.

LEA 17.2	Additional information.[Optional]
-------------	-----------------------------------

We apply the ACSI voting guidelines. Since 2009 UniSuper has sat on the committee that reviews those guidelines every 2 years (i.e. UniSuper has been directly involved in the review of the guidelines 3 times).

When we decide how to vote we review the proxy voting advice, along with a range of other inputs and take into account our own direct understanding of the issues at hand. We do not blindly follow the proxy voting advice. It is one, of a number of factors that is taken into consideration. At all times we seek to consider ESG and commercial matters in an integrated and pragmatic manner.

LEA 19	Voluntary	Descriptive	PRI 2
--------	-----------	-------------	-------

LEA 19.1	To ensure that your (proxy) votes are cast and reach their intended destination on time, indicate if you did the following.
-------------	---

- Obtain confirmation that votes have been lodged:
 - for a majority of votes
 - for a minority of votes
- Participate in projects to improve the voting trail and/or to obtain vote confirmation
- None of the above

LEA 19.2	Provide additional information on your organisation's vote confirmation efforts.
-------------	--

We have ISS run a vote report for us.

We also participated in a voting integrity project conducted by Ownership Matters.

LEA 20	Voluntary	Additional Assessed	PRI 2
--------	-----------	---------------------	-------

LEA 20.1	Indicate if your organisation has a securities lending programme.
-------------	---

- Yes

LEA 20.2	Indicate how voting is addressed in securities lending programme.
-------------	---

Please select one of the following

- We recall most securities for voting on all ballot items
- We recall some securities for voting on some ballot items on a systematic basis in line with specified criteria
- We occasionally recall some securities for voting on some ballot items on an ad-hoc basis
- We empower our securities lending agent to decide when to recall securities for voting purposes
- We do not recall our shares for voting purposes
- Other (please specify)
- No

LEA 20.3	Additional information. [Optional]
-----------------	------------------------------------

We always recall securities prior to an AGM, or in relation to any other corporate actions as appropriate.

LEA 21	Mandatory	Core Assessed	PRI 2
---------------	------------------	----------------------	--------------

LEA 21.1	Indicate if you ensure that companies are informed of the rationale when you and/or the service providers acting on your behalf abstain or vote against management recommendations.
-----------------	---

- Yes, in most cases
- Sometimes, in the following cases:
- No
- Not applicable as we and/or our service providers do not abstain or vote against management recommendations

LEA 21.2	Additional information. [Optional]
-----------------	------------------------------------

For all companies covered by ACSI's voting service, ACSI corresponds either via meeting or teleconference around the time of the company meeting, or writes to each company where there was an 'against' recommendation expressing its rationale and concerns. Companies where there are more material concerns become Corporate Governance engagement priorities where ACSI typically holds face to face meetings with the company urging it to change its practices.

Domestically, UniSuper always personally contacts companies to let them know when we are voting AGAINST a ballot item and verbally provides a rationale as to why such a decision has been made.

LEA 22.1 For listed equities where you and/or your service provider has the mandate to issue (proxy) voting instructions, indicate the percentage of votes cast during the reporting year.

We do track or collect this information

Votes cast (to the nearest 1%)

%

100

Specify the basis on which this percentage is calculated

- of the total number of ballot items on which you could have issued instructions
- of the total number of company meetings at which you could have voted
- of the total value of your listed equity holdings on which you could have voted

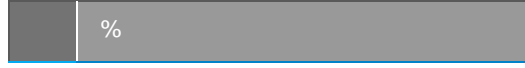

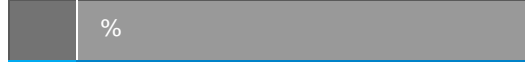

We do not track or collect this information

LEA 23	Voluntary	Descriptive	PRI 2
--------	-----------	-------------	-------

LEA 23.1 Indicate if you track the voting instructions that you and/or your third party have issued on your behalf.

Yes, we track this information

LEA 23.2 Of the voting instructions that you and/or third parties have issued on your behalf, indicate the proportion of ballot items that were:

Voting instructions	Breakdown as percentage of votes cast
For (supporting) management proposals	 <p>90</p>
Against (opposing) management proposals	 <p>10</p>
Abstentions	 <p>0</p>

100%

LEA 23.3	For the reporting year, describe your approach towards voting on shareholder resolutions.
-----------------	---

From a domestic Australian perspective, shareholder resolutions rarely occur in Australia. We have not yet supported any shareholder resolutions that have been put forward in Australia. To date, no such resolutions have accorded with our view of good governance and have often sought to intrude upon Management's remit.

No, we do not track this information

Add Example 1

Topic or ESG issue	G - Remuneration
Decision made by	<input type="checkbox"/> Internal staff <input checked="" type="checkbox"/> Service provider
Objectives	Ensure alignment of executive and shareholder interests, and appropriate board oversight.
Scope and Process	ACSI provided voting advice for 445 resolutions related to remuneration in the ASX200 (as well as around 50% more such resolutions for the next 100 largest companies).
Outcomes	Among the ASX200, ACSI opposed 78 (around 18%) of all resolutions. In all cases, ACSI wrote to the companies explaining its rationale and often follow up meetings were held. Of the priority companies, around 80% of the issues were at least partly resolved.

Add Example 2

Topic or ESG issue	G – Board composition and accountability
Decision made by	<input type="checkbox"/> Internal staff <input checked="" type="checkbox"/> Service provider
Objectives	<p>Broadly, there are two objectives:</p> <p>(1) Ensure appropriate board composition, including a majority of independent directors.</p> <p>(2) Ensure board accountability to shareholders for past decisions.</p>
Scope and Process	<p>ACSI provided voting advice for 544 resolutions related to boards in the ASX200 (as well as around 50% more such resolutions for the next 100 largest companies).</p> <p>See below for information on the process.</p>
Outcomes	<p>Among the ASX200, ACSI recommended opposing 38 (around 7%) of resolutions. In all cases, ACSI wrote to the companies explaining its rationale and often follow up meetings were held. Of the priority companies, around 40% of the issues get at least partly resolved.</p>

Add Example 3

Topic or ESG issue	G - Capital raising practices
Decision made by	<input type="checkbox"/> Internal staff <input checked="" type="checkbox"/> Service provider
Objectives	Ensure that companies undertake capital raisings in a way that gives existing shareholders the ability to participate or to be adequately compensated for any dilution they experience
Scope and Process	ACSI provided voting advice or information for 55 resolutions related to capital raisings in the ASX200. See below for information on the process.
Outcomes	Among the ASX200, ACSI opposed 5 (around 7%) of resolutions. ACSI wrote to the companies explaining its rationale and often follow up meetings were held. Of the priority companies, around two thirds of the issues get at least partly resolved.
