RI TRANSPARENCY REPORT

2013/14

Westmount Pacific LLC

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

PRI disclaimer

This document is based on information reported by signatories and responses have not been independently audited by the PRI Secretariat, PRI working groups, or any other third party. Screening: Initial screen: ADB/ IFC Prohibited Investment Activities List.

Second screen: On site inspection and review of any preliminary environmental, health, safety and labour (EHS) applicable documentation. Detailed EHS Document Request List given to the company.

Third screen: As a core component of ASEAN China Investment Fund (ACIF) due diligence (and as a pre-requisite to each ACIF investment approval), independent outside EHS and labour experts are fielded to assess how prospective investee companies are performing in respect of EHS benchmarks. The program benchmarks local laws against ADB/IFC performance standards/ILO standards.

To date, ACIF has carried over 35 investee company assessments in five countries. These assessments have covered a diverse range of industries, from instant noodles, clean energy, fertilizer production, ship building, edible oils, to oil and gas service industries.

Benchmarking&

Road Map Investee company screening provides a detailed, user-friendly "road map" (see example below/ in a bilingual format where necessary) that identifies for ACIF management and the investee company the following:

- Issues or potential issues related to compliance and the relevant laws/ regulations.
- Remedial actions to achieve compliance/ better practice recommendations.
- A time frame and estimated cost to achieve compliance.

This benchmarking/road map process provides companies with greater awareness of the laws/ regulations and the consequences of their acts or inaction and a time to get to compliance and beyond.

PE 05.4	Additional information. [Optional]
----------------	------------------------------------

It must be remembered that ESG in emerging markets is an ongoing development and no investment we have had independently assessed has been 100% compliant though a very small percentage have had few issues....getting companies just to legal compliance with local laws/ regs is the major issue, even while they may have internationally recognized standards, such as ISO, which is only as trust worthy as the consultants who issued the certification. These international standards can be misleading to the public.
