RI TRANSPARENCY REPORT

2013/14

William Blair & Company, LLC

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

We are not an activist investor. However, corporate governance and the treatment of minority investors is of significant importance to us. Our investment process takes into consideration issues that will impact the investment of shareholders prior to investing in that company. If we are not satisfied that the entity has shareholder interests foremost in their thinking regarding their capital allocation and business practice decisions, then this would not be a company in which we would invest.

We strongly believe that ESG analysis should be integrated into the company analysis; as a result, our analysts evaluate these issues in their company analysis. We believe this structure encourages a more holistic analysis of the company, assists us in engaging management if necessary, and ensures accountability.

William Blair's quality growth philosophy inherently incorporates a number of desirable ESG characteristics. Our analysts have historically evaluated corporate governance and transparency as part of their quality assessment of companies. As signatories to UNPRI, we have committed to the formal integration of ESG factors into our research process. To that effort, the analysts have been trained on using vendor-provided data so that we are consistently evaluating these non-financial factors across sectors, regions and size, and explicitly addressing any issues that may be identified.

We have integrated ESG considerations into our research process more formally across all of our non-U.S. and global strategies. In 2011, we hired GMI Ratings to assist us in evaluating ESG considerations more systematically and formally. Now, each research report includes a formal section explicitly addressing ESG, indicating the scores that GMI assesses for the company.

William Blair maintains comprehensive policies and procedures that are designed to ensure that the firm performs its investment advisory activities in compliance with applicable securities laws in accordance with its fiduciary duty to clients. Policies and procedures address responsibilities of the firm as well as ethical conduct required of employees. Areas addressed in the policies include, but are not limited, to the following:

- Code of Ethics (including conflicts of interest, personal trading, insider trading, gifts and entertainment, political contributions, and outside business activities);
- Portfolio Management, Trading and Research (including portfolio management, best execution, brokerage research and commissions, trade aggregation and allocation, derivatives, proprietary trading, trade errors, expert network policy, market rumors and cash solicitation);
- Valuation Procedures (related to its activities as investment adviser to the William Blair Funds)
- Client Information and Recordkeeping (including information security, privacy, recordkeeping, Form ADV, safeguarding client assets, and document disposal);
- Business Continuity Plan;
- Anti-Money Laundering;
- Communications with the Public (including marketing and advertising and media communications); and
- Proxy Voting.

The firm employs dedicated compliance professionals to monitor compliance with these policies, identify potential violations or weaknesses, and implement enhancements, as needed. We also utilize technological controls including Linedata/Longview Trade Order Management and Linedata Compliance monitoring system. In addition to monitoring portfolio management activities, IM Compliance is responsible for monitoring existing business practices for compliance with applicable policies and procedures, testing existing policies and procedures for continued effectiveness on an ongoing basis, and, as may be necessary, for directing potential problems to the attention of the General Counsel and senior management as necessary.

Lastly, our portfolio managers, compliance personnel, portfolio associates and portfolio administrators monitor client accounts on a regular basis to ensure the accounts are operating in accordance with guidelines.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

We believe that ESG factors are inextricably linked with our assessment of Management and financial statement quality, as well as the sustainability of competitive strengths. As a result, our research analysts assess various ESG factors in their analysis of whether or not a company meets our quality growth criteria.

We believe that ESG factors can have a significant impact on valuation, growth, and corporate performance. We do not have an aggregate ESG score for the portfolio given the lack of ESG research coverage on many of our holdings (particularly in emerging markets and small cap). However, our Quality Model score is consistently better than market benchmarks across our strategies (i.e. higher ROE, ROIC, lower debt, etc.).

We have integrated ESG considerations into our research process more formally across all of our non-U.S. and global strategies. In 2011, we hired GMI Ratings to assist us in evaluating ESG considerations more systematically and formally. Now, each research report includes a formal section explicitly addressing ESG, indicating the scores that GMI assesses for the company. The sections of the research report are as follows:

Governance/Environmental/Social Considerations

GMI Global ESG Rating - GMI Home Market ESG Rating

MSCI IVA Rating - Goldman Sachs ESG Rating

Highlight any overall conclusions or concerns.

Governance considerations:

GMI Global Governance Rating - GMI Home Market Governance Rating

The key focus is on transparency, oversight, shareholder value creation, accounting policies. Does the company practice good governance? How are executives compensated? Is it in line with shareholder interests and executive performance? Are there concerns about alignment of interests between management and outside shareholders (particularly when the company is closely held)? Is the board focused on shareholder interests and is it accountable? Is there an independent audit function and, if so, has it found significant issues? Does it report on these issues for shareholders? How conservative/aggressive are accounting practices?

Environmental Considerations:

GMI Global Environmental Rating - GMI Home Market Environmental Rating

The key focus is on resource management, product innovation, renewable energy/water use, report. Is this relevant? What is the company's environmental reporting/disclosure? Does it use resources effectively and minimum impact of operations? Have there been any past environmental issues? Any areas of concern?

Social Considerations:

GMI Global Social Rating - GMI Home Market Social Rating

The key focus is on human rights at the company and the supply chain, labor/management relations, product/workplace safety and community relations. What is the relationship between labor and management? Are there any other areas of concern here, including the company's history and policy supporting human rights, workplace safety, product safety, community relations, resource use, or specific political risks?

If there is a significant Environmental, Social, or Governance issue, analysts are expected to address it in their analysis. A company that scores poorly by GMI is not automatically excluded from consideration, but the issue must be addressed.
