RESPONSIBLE INVESTMENT
DUE DILIGENCE QUESTIONNAIRE
FOR REAL ESTATE INVESTORS

This responsible investment due diligence questionnaire (DDQ) has been developed to help investors appraising potential real estate investment managers to evaluate how a manager handles environmental, social and governance (ESG) factors. The responses to the questions will give an insight into the depth and breadth of ESG strategy used by the manager, the sophistication of their approach for integrating ESG factors into the investment process and the levels of ESG disclosure that they routinely provide.

A questionnaire can never replace the dialogue between manager and investor: this DDQ is designed to act as a starting point for such dialogue by providing a baseline list of questions that investors can ask managers. From this baseline, the PRI encourages investors to create additional, tailored questions to suit their broader objectives and their strategy, size, experience and resources.

By publishing this freely available tool, the PRI hopes to streamline industry practices and curb the proliferation of different approaches, which can be counterproductive for investors and their real estate investment managers.

The DDQ is divided into five sections:
- Policy and strategy – the overarching approach to responsible investment
- Governance and resourcing – who is involved in implementing the strategy and what support do they have
- Pre-investment – the steps taken during an acquisition to integrate ESG factors
- Portfolio management – the systems in place to manage ESG factors for existing assets
- Monitoring and reporting – the communication channels between the manager and investors

Notes on using this DDQ

This DDQ is intended to be used by an investor when selecting an investment manager for a real estate mandate. The questions are aimed at managers that make direct real estate investments.

This DDQ is based on the PRI Reporting Framework, with the corresponding sections marked for each question, enabling PRI signatories to populate their responses with answers from their private Transparency Reports. However, it is important to note the wider scope of the PRI Reporting Framework, which typically covers the entire organisation, whereas this DDQ is meant to assist investors assessing not only fund managers but specific investment vehicles/products.

Where questions broadly align with sections of the European Association for Investors in Non-Listed Real Estate Vehicles (INREV) DDQ, this has also been flagged.

Download a copy of the PRI Reporting Framework questions at www.unpri.org/reporting#RF. This includes explanatory notes that will be useful to organisations that are not already familiar with the Reporting Framework.
