## **Understanding this document**

In addition to the detailed indicator text and selection options, in each module of the PRI Reporting Framework, you can find information that will help you to identify which indicators are relevant for your organisation.

#### Top bar

Key information about each indicator is highlighted in the top bar, including the indicator status (mandatory or voluntary) and the purpose of the indicator.

	Indicator status	Purpose	Principle
xxx 01	MANDATORY	GATEWAY	

#### Indicator status

nulcator status				
MANDATORY		Mandatory indicators reflect core practices. These responses will be made public and must be completed to submit the framework.		
MANDATORY TO REPORT VOLUNTARY TO DISCLOSE		Some indicators are mandatory to complete but voluntary to disclose. These indicators may determine which subsequent indicators are applicable or are used for peering, but they may also contain commercially sensitive information		
VOLUNTARY		Voluntary indicators reflect alternative or advanced practices. These indicators are voluntary to report and disclose.		
Purpose				
Gateway	3	The responses to this indicator 'unlock' other indicators within a module if they are relevant for your organisation. Please refer to the logic box for more information.		
Descriptive		These are open-ended narrative indicators that allow you to describe your activities.		

#### Underneath the indicator

Underneath the indicator, you can find the explanatory notes and definitions that contain important information on interpreting and completing the indicators. Read the logic box to make sure an indicator is applicable to you.

xxx 01	EXPLANATORY NOTES		
xxx 01.1	This provides guidance on how to interpret the sub-indicators, including examples		
xxx 01.2	what could be reported.		
LOGIC			
xxx 01	This explains when this indicator is applicable and/or if it has an impact on subsequent indicators. If there is no logic box, the indicator is always applicable and does not affect other indicators.		

xxx 01	DEFINITIONS
xxx 01	Specific terms that are used in the indicator are defined here.

AC 01.2	Describe how you ensure that your clients understand your service offerings and fee structure.
	Additional information.
AC 01.3	[OPTIONAL]

AC 01	EXPLANATORY NOTES		
AC 01	This indicator allows you to indicate what types of services are included in your Advisory and Consultancy business offerings. Your response to this indicator will unlock the relevant indicators in this module.		
AC 01.2	Actions might include presenting your fee breakdown and its correlation to your services, giving a detailed explanation of how your services will contribute to the goals and objectives of your clients and keeping information about your services updated on your website.		
LOGIC			
	AC 05 will be applicable if you report that your services include 'Custodial services'		
	AC 06 will be applicable if you report that your services include 'Investment policy development'		
AC 01	AC 07 – AC 09 will be applicable if you report that your services include 'Strategic asset allocation'		
	AC 10 – AC 11 will be applicable if you report that your services include 'Investment research'		

AC 01	DEFINITIONS
Custodial services	Holding and protecting customer funds or investments. Custodial services may also include account administration, settling purchases and sales, managing clients' accounts and transactions and ensuring tax compliance.
Investment policy development	Assisting clients in developing an investment policy may refer to a single policy document that applies across the organisation, or to a group of documents that, together, define the organisation's approach to responsible investment and associated issues.
Strategic asset allocation	Strategic asset allocation covers advice on investment allocation to high-level asset classes according to their differing returns and risk profiles in order to match the investor's risk tolerance, time horizon, and investment objectives/beliefs. This may refer to long-term portfolio construction advice as well as short/medium-term asset allocation advice (this may include tactical asset allocation). Actions may include asset/liability modelling, ESG risk management, choosing an appropriate equity/fixed income/cash split, developed/emerging market split, duration of fixed income, and listed/unlisted split.
Investment research	Investment research (sometimes referred to as portfolio research) refers to asset and/or holding level research, and may include actions such as equity research, credit research, and quant research or specific market research. This would be expected to be done for either strategic asset allocation or for the manager selection in a particular market.
Manager selection and/or monitoring	The process of identifying a universe of potential investment managers in a particular market, geography shortlisting and selecting them, and/or overseeing performance against agreed metrics.

AC 02.3					

AC 02	EXPLANATORY NOTES	
	This indicator aims to capture the scope pf your influence and the services you offer and develop for your clients.	
AC 02.1	'Assets under advisement' refers to assets that your organisation provides services for as a third party, on behalf of a beneficial owner. The reported assets under advisement should cover all of your services, and not just those with ESG components.	
	Your assets will be automatically calculated into USD.	
AC 02.3	You may use this space to provide insight into how your organisation defines 'assets under advisement'.	
AC 02	LOGIC	
AC 02.1	AC 02.2 will be applicable if you select 'Not applicable' in AC 02.1	

AC 02	DEFINITIONS
Assets under advisement	The term 'assets under advisement' refers to assets for which a third party organisation provides services that are beneficially owned by clients. The assets should not be considered part of an organisation's balance sheet. Services provided do not include active investment management. Rather, the services offered are generally non-financial and/or administrative in nature.

AC 03.1	AC 03.2 will be applicable if you select "Yes, we do" in AC 03.1.  AC 03.3 will be applicable if you select "Yes, we do" in AC 03.1.	

AC 03	DEFINITIONS
Fiduciary management	Is a governance structure whereby an asset owner appoints a third party to delegate part of their investment process and act on their behalf. The scale of fiduciary management can range from full delegation of investment decisions and day-to-day running of portfolios, to partial delegation of portfolios or strategic de-risking.
	Fiduciary management is often referred to as implemented consulting, delegated derisking or outsourced CIO.

AC 13	EXPLANATORY NOTES
	This indicator will allow you to demonstrate which activities you normally include when selecting a manager.
	Strategy
	'Assessing the time horizon of the manager's offering vs. your client's requirements' - this also includes assessing how the time horizon fits with your client's ESG objectives and how it's reflected with the investment managers' portfolio turnover rate.
	'Assessing the quality of the manager's investment policy and its reference to ESG' - this could mean reviewing the references to ESG, the coverage of the policy in terms of regions, products, strategies and asset classes also understanding how any changes in the policy are implemented.
	ESG people/oversight
AC 13.1	'Assessing the ESG expertise of investment teams' - understand if there is an ESG team, specialists or if ESG function is integrated throughout the investment team. If there is a separate ESG team – review where is it based and how it works together with the rest of the organisation. If ESG responsibilities are integrated throughout the teams – understand how the team is trained and recruited to ensure that they have the ESG skills and competencies. This may include a discussion of, for example, any differences between mandates, strategies or markets.
	Process/portfolio construction
	'Review the impact of ESG analysis on investment decisions by the manager' - Understanding the investment process – is the investment manager using fundamental analysis or thematic, this determines how ESG materiality is identified, and is the process driven by qualitative or quantitative factors.
	Selection process and reviewing documentation
	Meetings with the potential shortlisted managers can include video conference and other multimedia meetings.
	'Review assurance process' refers to reviewing the assurance process that the investment manager applies to its financial or other reports. Reviewing this process would ideally result in you as an organisation being more confident in the data and information that the investment manager presents to you.

AC 16.2	Describe how you raise and manage concerns when monitoring investment managers on ESG factors.	
	Additional information	
AC 16.3	[OPTIONAL]	

AC 16	EXPLANATORY NOTES
	ESG score and weight does not have to be quantitative; this could also be assurance requirements or complying with minimum standards.
	ESG objectives linked to investment strategy - objectives set to adhere to Codes of Conduct, your organisation's investment strategy, investment policy and/or statement of beliefs and similar strategy / governance documents.
	Investment restrictions and any controversial investment decisions – this could mean checking if investment manager has invested or disinvested with a non-consensus view.
AC 16.2	ESG portfolio characteristics – this would include reviewing what companies are in the portfolio, what are their respective ESG scores and how has the ESG composition of the portfolio changed from the last reporting period. This could also include reviewing examples of turnover for the monitored time period.
	Information on any ESG incidents – this could also include any examples of previously bought stock being sold due to ESG factors.
	Metrics on the real economy influence of the investments – this could for example be the energy efficiency of the portfolio of buildings.
AC 16.3	You may wish to comment on variations in the reporting provided by the selected managers and on the reasons for these variations (e.g. does it reflect their contractual obligations? Is it a function of asset class or the types of investment being made?).
	If you require investment managers to undertake carbon portfolio monitoring, you are strongly encouraged to report this using the 'additional information' field.

AC 16	DEFINITIONS
ESG factors/issues	A definitive list of environmental, social, and governance (ESG) issues does not exist. It would not be possible or desirable to produce a list, or a set of definitions, that claimed to be exhaustive or definitive. Any such list would inevitably be incomplete and would soon be out of date. Nonetheless, the table below provides examples of ESG issues, for guidance purposes.
Environmental (E)	Issues relating to the quality and functioning of the natural environment and natural systems. These include: biodiversity loss, greenhouse gas (GHG) emissions, climate change, renewable energy, energy efficiency, air, water or resource depletion or pollution, waste management, stratospheric ozone depletion, changes in land use, ocean acidification, and changes to the nitrogen and phosphorus cycles.
Social (S)	Issues relating to the rights, well-being and interests of people and communities. These include: human rights, labour standards in the supply chain, child, slave, and bonded labour, workplace health and safety, freedom of association and freedom of expression, human capital management and employee relations; diversity; relations with local communities, activities in conflict zones, health and access to medicine, HIV/AIDS, consumer protection; and controversial weapons.
Governance (G)	Issues relating to the governance of companies and other investee entities. In the listed equity context these include: board structure, size, diversity, skills and independence, executive pay, shareholder rights, stakeholder interaction, disclosure of information, business ethics, bribery and corruption, internal controls and risk management, and, generally speaking, issues dealing with the relationship between a company's management, its board, its shareholders, and its other stakeholders. This category may also include matters of business strategy, encompassing both the implications of business strategy for environmental and social issues, and how the strategy is to be implemented. In the unlisted asset classes, governance issues also

include matters of fund governance, such as the powers of advisory committees, valuation issues, fee structures, etc.
