| Explanatory notes    |   |
|----------------------|---|
| Purpose of indicator | This indicator aims to capture whether a signatory's responsible investment policy includes environmental, social and governance guidelines for its private equity investments. Many investors will have an organisation wide ESG or RI policy that covers all asset classes. A policy covering all asset classes is likely to leave space for interpretation regarding its application to private equity. Adapting this into specific ESG guidelines for an organisation's private equity investments and including the full scope of an organisation's ESG approach for its investments in private equity is considered good practice and will help align expectations and practices related to responsible investment in private equity. |
| Additional reporting | ESG guidelines specific to an organisation's private equity investments may appear in a standalone document or the overall policy document.   |
| guidance             | A '100-day plan (or equivalent)' is a document that contains a list of activities the investor needs to undertake within the first 100 days of investment.  |

| Other resources     | For further guidance, see An introduction to responsible investment: private equity.   |   |  |  |  |  |  |
|---------------------|--|---|--|--|--|--|--|
|                     | For guidance on how to write an RI policy, refer to An introduction to responsible investment: policy, structure and process.  |   |  |  |  |  |  |

### FUNDRAISING

#### **COMMITMENTS TO INVESTORS [PE 2]**

| Indicator ID<br>PE 2   | Dependent on: | 00 21 | Sub-section              | PRI Principle | Type of indicator |  |
|--|---------------|-------|--------------------------|---------------|-------------------|--|
|  | Gateway to:   | N/A   | Commitments to investors | 1, 4          | CORE              |  |
| For all of the funds that you closed during the reporting year, what type of formal responsible investment commitments did you make in Limited Partnership Agreements (LPAs), side letters or other constitutive fund documents?<br>If you did not close any funds during this reporting year, refer to the last reporting year in which you closed funds, up to five years ago. |               |       |                          |               |                   |  |
| O (A) We incorporated responsible investment commitments in LPAs (or equivalent) as a standard default procedure   |               |       |                          |               |                   |  |
| <ul> <li>O (B) We added responsible investment commitments in LPAs (or equivalent) upon clients' request</li> <li>O (C) We added responsible investment commitments in side letters upon clients' request</li> </ul>   |               |       |                          |               |                   |  |
| O (D) We did not make any formal responsible investment commitments for the relevant reporting year  |               |       |                          |               |                   |  |
| O (E) Not applicable; we have not raised funds in the last five years  |               |       |                          |               |                   |  |

| Explanatory notes             |  |
|-------------------------------|--|
| Purpose of indicator          | The purpose of this indicator is to understand whether and when a general partner (GP) has incorporated ESG and responsible investment (RI) commitments into fund-level legal documentation. It is considered good practice to formally commit to responsible investment in LPAs, side letters or other constitutive fund documents. |
|                               | This indicator is only applicable to GPs who invest from fund structures.  |
| Additional reporting guidance | Signatories should report on any formal commitments related to responsible investment implementation and consideration of ESG issues that were either requested by LPs and included in LPAs, side letters and/or other constitutive fund documents or initiated by the GP.   |
|                               | If no funds were closed during the reporting year, the last reporting year in which funds were closed (up to five years ago) should be referenced.   |
| Other resources               | Refer to Incorporating responsible investment requirements into private equity fund terms for further guidance.  |

| O (C) We assessed ESG materiality at the industry level only [As above]   |                              |                 |              |                                     |                    |                   |
| O (D) We did not conduct ESG materiality analyses for our potential private equity investments  |                              |                 |              |                                     |                    |                   |

| Explanatory notes    |  |
|----------------------|--|
| Purpose of indicator | This indicator aims to identify how a signatory conducts materiality analyses of ESG factors as a standard part of its due diligence process during the pre-investment phase by indicating the depth and quality of its materiality assessment. It is considered good practice to conduct materiality analyses at the portfolio company level, whether using internal or external resources. |

| Additional reporting guidance | Signatories should indicate the proportion of potential private equity investments their ESG materiality analyses considered.   |     |   |  |  |  |  |
|-------------------------------|---|-----|---|--|--|--|--|
| Other resources               | For information on materiality analyses, see the PRI blog post on Using SASB to implement PRI monitoring and disclosure resources for private equity.   |     |   |  |  |  |  |

| Explanatory notes             |  |
|-------------------------------|--|
| Purpose of indicator          | This indicator aims to capture the tools, standards or data an organisation uses to inform their materiality analysis of ESG factors as a standard part of its due diligence process, whether as part of an internal checklist or ESG tool or scorecard, during the pre-investment phase. This analysis may be completed internally using in-house tools or methodologies or externally via a service provider. It is considered good practice to use a range of tools and resources to ensure that in-depth ESG materiality assessments are conducted. The specific tools and resources used may vary depending on the context of the potential investment, e.g. industry sector and geography. |
| Additional reporting guidance | One way to conduct the private equity materiality analysis is by extracting information from the prospective company through direct engagement, which might take the form of a survey, either bespoke or using Invest Europe ESG DDQ, or other similar due diligence questionnaires.<br>Links to various standards listed:   |

| Explanatory notes             |   |  |  |  |  |
|-------------------------------|---|--|--|--|--|
| Purpose of indicator          | This indicator aims to capture the processes an organisation uses to conduct due diligence on material ESG-related risks at the pre-investment stage. It also assesses what internal or external resources are allocated to such processes and how material ESG factors are used to identify opportunities to create value. It is considered good practice to carry out due diligence to a sufficient depth, such that material ESG-related risks can be identified and assessed, and ESG value creation opportunities can also be identified for action during the post-investment period. A minimum standard of ESG due diligence could be a combination of desk-based research on publicly available information and working knowledge of ESG impacts on the target industry and sector. |  |  |  |  |
| Additional reporting guidance | <ul> <li>'We conduct site visits' refers to physical visits made to the operational sites of prospective assets or portfolio companies.</li> <li>'Third-party consultants' refers to organisations or persons to which participants outsource some or all of their ESG strategy formulation and/or implementation.</li> <li>For examples of ESG questionnaires that can be sent to target companies, refer to the ESG Due Diligence Questionnaire for Private Equity.</li> </ul>  |  |  |  |  |
| Logic                         |   |  |  |  |  |

|----------------------|---|----------------------|---|--|--|--|--|--|
| Purpose of indicator | This indicator aims to capture the depth of processes and resources an organisation implements to help meet their targets on material ESG factors. Actively managing ESG performance requires organisations to adopt a range of potential processes and ensure that adequate resources are provided. The specific processes and level of resources will depend on the context of the portfolio company. In all cases, however, these processes and resources should be regularly assessed and adjusted according to their effectiveness to meet the given targets on material ESG factors for all private equity investments. |                      |   |  |  |  |  |  |
| Other resources      | For further guidance, see An introduction to responsible investment: private equity.<br>For further guidance, see the BII (formerly CDC Group) ESG toolkit.   |                      |   |  |  |  |  |  |

| Explanatory notes             |   |
|-------------------------------|---|
| Purpose of indicator          | It is important that ESG is sufficiently integrated into the investment process and that the standard toolkit of the private equity investment and value creation process is utilised. The 100-day plan is part of this toolkit. If material ESG risks and opportunities are not included in a 100-day plan, there is a risk that significant issues discovered during due diligence will not receive enough immediate attention. |
| Additional reporting guidance | Signatories should use this opportunity to illustrate how their ESG due diligence findings are linked to actions taken at portfolio companies by investment teams and other professionals.<br>A '100-day plan (or equivalent)' is a document that contains a list of activities the investor needs to undertake within the first 100 days of investment.  |
| Other resources               | For more information on ESG monitoring, see ESG monitoring, reporting and dialogue in private equity.   |

#### Explanatory notes

| Purpose of indicator | This indicator aims to capture how an organisation uses the management of material ESG factors to create value during the holding period of an investment. It is considered good practice for investors to develop ESG action plans that can be updated according to ongoing performance to create value during the holding period of an investment.<br>ESG risks and ESG opportunities should be re-assessed continuously to better understand the performance of the investment portfolio and to identify areas for continuous improvement in their management. A structural approach allows the signatory to assess the ESG performance within and among portfolios and potentially assess the performance of other investment managers. |                     |   |  |  |  |  |  |  |

| Explanatory notes    |   |
|----------------------|---|
| Purpose of indicator | This indicator provides an opportunity for minority investors to describe their attempts to work with other investors or partners to ensure that material ESG risks are adequately addressed in their private equity investments. Even where minority investors are not in a position to directly control investee company consideration and the management of ESG risks, it is considered good practice to work with other investors and partners to develop a common agenda or approach to ESG and support measures – to the extent possible – to help implement that agenda. |

| Explanatory notes    |   |  |  |  |  |  |  |
|----------------------|---|--|--|--|--|--|--|
| Purpose of indicator | This indicator provides the signatory with the opportunity to describe what practices they use in ESG action plans throughout the investment period and how they are used to create value and manage risks. It is important to have appropriate systems in place to manage issues on an ongoing basis. One of the key processes includes writing an action plan for each portfolio company to identify ways to improve ESG performance. |  |  |  |  |  |  |

|-------------------------------|--|--|--|--|--|--|--|--|
| Purpose of indicator          | This indicator aims to assess how the signatory ensures that adequate ESG-related competence exists at the portfolio company level through its strategy, policy and training efforts. It is considered good practice to ensure adequate ESG-related competence exists at the portfolio company level, including ensuring that material ESG factors receive board-level attention for all private equity investments. These practices should be regularly reviewed and adapted depending on performance and overall needs.  |  |  |  |  |  |  |  |
| Additional reporting guidance | In this indicator, 'external ESG expertise' refers to consultants or other expert ESG advice drawn from outside of the signatory organisation.<br>'C-suite executives' refers to a team of individuals with the day-to-day responsibility of managing the entity. These staff members are sometimes referred to within corporations as<br>senior management, executive management, executive leadership team, top management, upper management, higher management or seniors.<br>For more information on board oversight of ESG, see BII (formerly CDG Group) Board Oversight of ESG Guidance. |  |  |  |  |  |  |  |

| Explanatory notes            |   |  |  |  |  |
|------------------------------|---|--|--|--|--|
|                              | This indicator aims to understand a signatory's specific approach to the communication of targets on material ESG factors and related data to its private equity investments and allows signatories to demonstrate the level of transparency concerning their responsible investment practices. It is considered good practice for signatories to disclose information about their investment activities to the public and investors annually or more frequently. |  |  |  |  |
| Purpose of indicator         |   |  |  |  |  |
|                              | Private market investments are less transparent than public investment markets. As a result, private market investment managers have an additional responsibility to be transparent to investors and proactively report ESG-related portfolio information. In addition, some jurisdictions are currently developing regulations requiring investment managers to report   |  |  |  |  |
|                              | some ESG-related portfolio information to their clients.  |  |  |  |  |
| Reference to other standards | For an example of an industry-led set of standardised ESG metrics, see ESG Data Convergence Project.  |  |  |  |  |
