INVESTMENT GUIDELINES [RE 1]

Indicator ID RE 1	Dependent on: Gateway to:	00 21, 00 24, 00 26 N/A	Sub-section Investment guidelines	PRI Principle 1 to 6	Type of indicator		
What real estate-specific ESG guidelines are currently covered in your organisation's responsible investment policy(ies)?							
□ (A) Guidelines	(A) Guidelines on our ESG approach to real estate depending on use (e.g. retail and education) and geography						
()		bach to new construction					
. ,		bach to major renovations	atmosta				
. ,		bach to standing real estate inves	stnents				
 (E) Guidelines on pre-investment screening (F) Guidelines on our approach to ESG integration into short-term or 100-day plans (or equivalent) 							
. ,		to ESG integration into long-term					
□ (H) Guidelines on our approach to ESG reporting							
 (I) Guidelines on our engagement approach related to third-party property managers 							
□ (J) Guidelines on our engagement approach related to tenants							
. ,		nt approach related to construction					
O (L) Our responsible investment policy(ies) does not cover real estate-specific ESG guidelines							

Explanatory notes	
Purpose of indicator	This indicator aims to capture whether a signatory's responsible investment policy includes environmental, social and governance guidelines for its real estate assets. Many investors will have an organisation-wide ESG or responsible investment policy that covers all asset classes. A policy covering all asset classes is likely to leave space for interpretation regarding its application to real estate. Adapting it into specific ESG guidelines for investments in real estate and including the full scope of an organisation's ESG approach for its real estate assets is considered good practice and will help align expectations and practices related to responsible investment in real estate.

	ESG guidelines specific to an organisation's real estate investments may appear in a standalone document or the overall policy document.				
Additional reporting guidance	In this indicator, 'tenant' refers to a person or group that occupies a house, office, industrial estate or similar.				
	A '100-day plan (or equivalent)' is a document that contains a list of activities the invest	tor needs to undertake within the first 100 days of investment.			
0.1	For further guidance, see An introduction to responsible investment: real estate.				
Other resources	For guidance on how to write an RI policy, refer to An introduction to responsible investigation of the second sec	tment: policy, structure and process.

FUNDRAISING

COMMITMENTS TO INVESTORS [RE 2]

Indicator ID	Dependent on:	00 21	Sub-section	PRI Principle	Type of indicator	
RE 2	Gateway to:	N/A	Commitments to investors	1, 4	CORE	
For all of the funds that you closed during the reporting year, what type of formal responsible investment commitments did you make in Limited Partnership Agreements (LPAs), side letters, or other constitutive fund documents? If you did not close any funds during this reporting year, refer to the last reporting year in which you closed funds, up to five years ago.						
O (B) We added iO (C) We added iO (D) We did not	responsible invest responsible invest make any formal	ment commitments in LPAs (or e ment commitments in side letters	nents for the relevant reporting year			

Explanatory notes	
Purpose of indicator	The purpose of this indicator is to understand whether and when a general partner (GP) incorporates ESG and responsible investment commitments in fund-level legal documentation. It is considered good practice to formally commit to responsible investment in LPAs, side letters or other constitutive fund documents.
	This indicator only applies to GPs who invest from fund structures.
Additional reporting guidance	Signatories should report any formal commitments related to responsible investment implementation and consideration of ESG issues that were either initiated by the GP or requested by LPs and included in LPAs, side letters and/or other constitutive fund documents.
	If no funds were closed during the reporting year, the last reporting year in which funds were closed (up to five years ago) should be referenced.
Other resources	Refer to Incorporating responsible investment requirements into private equity fund terms for further guidance.

PRE-INVESTMENT

MATERIALITY ANALYSIS [RE 3, RE 3.1]

Indicator ID RE 3	Dependent on: Gateway to:	00 21 RE 3.1	Sub-sectionPRI PrincipleMateriality analysis1		Type of indicator	
During the reporti	During the reporting year, how did you conduct ESG materiality analysis for your potential real estate investments?					
If signatories did no real estate investm		ential real estate investments in	the reporting	year, they should refer to the last report	ing year in which they	analysed potential
	[Dropdown list]					
O (A) We assesse	 O (A) We assessed ESG materiality for each property, as each case is unique (1) for all of our potential real estate investments (2) for a majority of our potential real estate investments (3) for a minority of our potential real estate investments 					
	O (B) We performed a mix of property level and property type or category level ESG materiality analysis [As above]					
O (C) We assess	O (C) We assessed ESG materiality at the property type or category level only [As above]					
O (D) We did not conduct ESG materiality analysis for our potential real estate investments						

Explanatory notes	
Purpose of indicator	This indicator aims to identify how a signatory conducts materiality analysis of ESG factors as a standard part of its due diligence process during the pre-investment phase by indicating the depth and quality of its materiality assessment. It is considered good practice to conduct property-specific materiality analysis, whether using internal or external resources.

Additional reporting guidance	Signatories should indicate the proportion of potential real estate investments their ESG materiality analysis considered.						
Other resources	For information on materiality analysis, see a PRI to	olog post on Using	SASB to implement PRI monitoring and disc	closure resources for private equity.

Explanatory notes				
Purpose of indicator	This indicator aims to capture the tools, standards and data an organisation uses to inform their materiality analysis of ESG factors as a standard part of its due diligence process, including as part of an internal checklist or ESG tool or scorecard, during the pre-investment phase. This analysis may be completed internally using in-house tools or methodologi or externally via a service provider. It is considered good practice to use a range of tools and resources to ensure that in-depth ESG materiality assessments are conducted. The specific tools and resources used may vary depending on the context of the potential investment, e.g. industry sector and geography.			
Additional reporting guidance	Links to various standards listed: Global Reporting Initiative (GRI) Standards Value Reporting Foundation (Sustainability Accounting Standards Board - SASB standards) Task Force on Climate-related Financial Disclosures (TCFD)

DUE DILIGENCE [RE 4, RE 5]

	Indicator ID	Dependent on:	00 21		Sub-section	PRI Principle	Type of indicator
	RE 4	Gateway to:	N/A		Due diligence	1	CORE
Dur	ring the reportin	ng year, how did	material ESG factors influenc	e your select	tion of real estate investments?		
	f signatories did not select any real estate investments in the reporting year, they should refer to the last reporting year in which they selected real estate nvestments.						
					[Dropdown list]		
	(A) Material ESG factors were used to identify risks				(1) for all of our potential real estate investments(2) for a majority of our potential real estate investments(3) for a minority of our potential real estate investments		
	 (B) Material ESG factors were discussed by the investment committee (or equivalent) 			nittee (or	[As above]		
	 (C) Material ESG factors were used to identify remedial actions for our 100- day plans (or equivalent) 			[As above]			
	 (D) Material ESG factors were used to identify opportunities for value creation 		alue	[As above]			
	. ,	he due diligence	d our decision to abandon poten phase in cases where ESG risks				
	(F) Material ES and/or paid	G factors impacte	d investments in terms of the pri	ice offered	[As above]		

O (G) Material ESG factors did not influence the selection of our real estate investments

Explanatory notes						
Purpose of indicator	This indicator aims to understand whether an organisation includes ESG-related information in the investment selection process and ascertain the depth of the analysis performed. It is considered good practice for material ESG factors to have played an integral part in decision-making for all real estate investment selections during the reporting year.					
Additional reporting guidance	By real estate investment selection, we mean new real estate investments that were made during the reporting year. A '100-day plan (or equivalent)' is a document that contains a list of activities the investor needs to undertake within the first 100 days of investment. By 'our decision to abandon potential investments in the due diligence phase', we mean any decision that would allow for the abandonment of potential investments following issues that come to light during the due diligence phase. It would be completed after any screening of potential investments, with an exclusion list.

	(I) Other Specify: [Mandatory free text: small]	[As above]
0	(J) We do not conduct due diligence on material ESG factors for potential real e	estate investments

Explanatory notes		
Purpose of indicator This indicator aims to capture the processes an organisation uses to conduct due diligence on material ESG-related risks at a pre-investment stage. It also assesses what i external resources are allocated to such processes and how material ESG factors are used to identify opportunities to create value. It is considered good practice to carry of diligence to a sufficient depth, such that material ESG-related risks can be identified and assessed, and ESG value creation opportunities can also be identified for action d post-investment period. A minimum standard of ESG due diligence could be a combination of desk-based research on publicly available information and working knowledge impacts on the target industry and sector.		
Additional reporting guidance 'We conduct site visits' refers to physical visits made to operational sites of prospective assets or portfolio companies. 'Third-party consultants' refers to organisations or persons to which participants outsource some or all of their ESG strategy formulation and/or implementation.

□ (F) Other							
Specify: [N	Mandatory free tex	kt: small]					
O (G) We did not	include material E	SG factors in our selection of th	ird-party property managers				
 (D) We requested documentation from potential third-party property managers on their responsible procurement practices, including responsibilities, approach and incentives (E) We requested the assessment of current and planned availability and aggregation of metering data from potential third-party property managers (F) Other Specify: [Mandatory free text: small] 							

Explanatory notes	
Purpose of indicator	This indicator aims to understand how signatories assess a third-party property manager's track record and expertise during the selection process to ensure alignment with their responsible investment practices. It is considered good practice for real estate investors with third-party property managers to consider material ESG factors in their selection approach.

	As day-to-day property management is often outsourced to a third-party property manager, the successful management of material ESG factors will rest on selecting good third-party property managers and understanding how to work with them effectively. Good practice in property manager selection involves understanding not only high-level ESG policies that					
	property managers and understanding now to work with them enectively. Good practice in property managers selection involves understanding not only high-level 2.56 policies that property managers have in place but also the depth and breadth to which those policies are implemented by the managers.					
Additional reporting	This section is only applicable if the signatory outsources property management to third-pa	rty property managers, as reported in the Organisational Overview module.				
Additional reporting guidance If signatories manage all properties in-house, this indicator will not be applicable. If signatories manage some properties in-house and outsource others, the those assets for which the management is outsourced.

(F) Other Specify: [Mandatory free text: small]			[As above]				
O (G) We did not	D (G) We did not include material ESG factors in the appointment of third-party property managers						

Explanatory notes								
Purpose of indicator	This indicator aims to understand how the signatory includes material ESG factors in the legal agreement with a third-party property manager in alignment with its internal responsible investment practices. It is considered good practice for real estate investors who outsource property management to third-party property managers to consider material ESG factors in their appointment approach.							
	As day-to-day property management is often outsourced to a third-party property manager, the inclusion of material ESG factors in legal agreements between the investor and third- party property managers will help define the extent to which these factors are actively managed by the latter and assessed by the former.							
	This section is applicable only if the signatory outsourc	es property mar	nagement to third-party property managers, as reported	in the Organisational Overview module.				
Additional reporting guidance	If signatories manage some properties in-house and ou	utsource some,	they should consider only those assets for which manag	gement is outsourced.				
-	A majority refers to \geq 50%, and a minority refers to $<$ 50° managers.	% of third-party	property managers. The coverage for each option shoul	ld be based on the number of third-party property

	 (D) We monitor progress reports on engagement with tenants 				[As above]		
	□ (E) We require formal reporting at least yearly				[As above]		
	(F) We have discussions about material ESG factors with all relevant stakeholders at least yearly			[As above]			
	 (G) We conduct a performance review of third-party property managers against targets on material ESG factors and/or a financial incentive structure linked to material ESG factors 			[As above]			

	(H) We have internal or external parties conduct site visits at least yearly	[As above]			
	(I) Other Specify: [Mandatory free text: small]	[As above]			
0	O (J) We do not include material ESG factors in the monitoring of third-party property managers				

Explanatory notes				
Purpose of indicator	This indicator aims to understand the methods used by the signatory to examine third-party property managers' performance and how to work with them to improve performance in alignment with its internal responsible investment practices. It is considered good practice for property investors who outsource property management to third-party property managers to consider material ESG factors in their monitoring approach.			
	place to determine how the managers' and assets' ESG performance will be assessed and monitored by the investor.			
	This section is applicable only if the signatory outsources property management to third-party property managers, as reported in the Organisational Overview module.			
	If signatories manage all properties in-house, this indicator will not be applicable. If signatories manage some properties in-house and outsource some, they should consider only those assets for which management is outsourced.			
Additional reporting guidance	A majority refers to ≥50%, and a minority refers to <50% of third-party property managers. The coverage for each answer option should be based on the number of third-party property managers.			
	'We conduct site visits' refers to physical visits made to the operational sites of prospective assets or portfolio companies.			
	A 'tenant' is a person or group that occupies a house, office, industrial estate or similar.			
Other resources	For further guidance, see An introduction to responsible investment: real estate.

CONSTRUCTION AND DEVELOPMENT

CONSTRUCTION REQUIREMENTS [RE 9]

Indicator ID	Dependent on:	00 24	Sub-section	PRI Principle	Type of indicator	
RE 9	Gateway to:	N/A	Construction requirements	1	CORE	
What ESG require	ments do you cu	rrently have in place for all de	evelopment projects and major renovations?	•	-	
□ (A) We require	the management	of waste by diverting materials (e.g. from construction and demolition, reusable veget	ation, rocks and soil) f	rom disposal	
		•	rould affect the surrounding community			
	•	of an environmental and social s	•			
	•	he air quality during construction				
	•		oils disturbed during construction and/or during previo	•		
	•	-	aquatic ecosystems by controlling and retaining const	ruction pollutants		
		ng of health and safety at the co				
. , .	 (H) We require engagement with local communities and other stakeholders during the design and/or planning process 					
□ (I) Other	_ [Mandatory free	text: small]				
		nents in place for development p	projects and major renovations			

Explanatory notes	
Purpose of indicator	This indicator aims to assess how an organisation approaches the incorporation of environmental and social factors into the construction of new buildings and/or major renovations. Having sustainability requirements in place for development projects and major renovations shows the level of responsibility that an organisation takes in making properties more sustainable. It is considered good practice for ESG issues to be considered in active property developments and major renovations to help reduce the negative effects of construction sites.
Additional reporting guidance	An answer option should only be selected if it applies to ALL active property development projects and major renovations.

Other resources	See Sustainable Real Estate Investment: Implementing the Paris Climate Agreement - An Action Framework for more information on sustainability in real estate investment.

□ (F) We requi	□ (F) We require water conservation measures		[As above]			
□ (G) We requ	re common health a	and well-being measures for occ	upants	[As above]		

	I (H) Other Specify: [Mandatory free text: small]	[As above]		
С	O (I) We do not have minimum building requirements in place for development projects and major renovations			

Explanatory notes			
Purpose of indicator	This indicator aims to assess whether an organisation incorporates environmental and social factors into development projects and major renovations. Having minimum building requirements in place shows the level of responsibility accepted by the signatory to make properties more sustainable and should also bring potential cost savings to light. It is considered good practice to include environmental and health requirements in development projects and in the selection of materials to conserve resources, reduce waste, limit the impact of new buildings and mitigate the health risks associated with the use of harmful materials.		
Additional reporting guidance	The coverage for each answer option should be based on the number of active property development projects and major renovations. Active property developments or major renovations refer to those taking place during the reporting year. See GRESB building certification schemes for a list of green building certification schemes concerning design and/or construction. See Well and Fitwel for examples of healthy building certifications.

During the reporti	During the reporting year, what ESG building performance data did you collect for your real estate assets?						
□ (A) Energy con	sumption		[Dropdown list](1) for all of our real estate assets(2) for a majority of our real estate assets(3) for a minority of our real estate assets				
□ (B) Water consumption			[As above]				
□ (C) Waste production			[As above]				
 (D) Other Specify: [Mandatory free text: small] 			[As above]				
O (E) We did not collect ESG building performance data for our real estate assets				5			

Explanatory notes	
Purpose of indicator	This indicator aims to examine the measures taken by the signatory to improve ESG performance data related to its assets. It is considered good practice to collect the performance of ESG metrics on an ongoing basis to help real estate managers and investors better monitor their building performance, manage risks and present clients with more accurate reports.
Additional guidance	According to the 2022 GRESB Real Estate Assessment: Data measurement and the consistent reporting of energy consumption help entities conceptualise overall energy consumption, increase the energy efficiency of their portfolio and reduce the economic and environmental impacts associated with fossil fuel energy use.

	By 'energy consumption', we mean electricity, fuels and district heating and cooling. Consistent collection of water consumption data provides property companies and fund managers with the information needed to monitor their environmental impact, reduce the burden on potable water consumption and wastewater systems, assess their exposure to risks of disruptions in water supplies and reduce water expenditures.

O (I) We do not have processes in place to help meet our targets on material ESC	G factors for our real estate investments

Explanatory notes								
Purpose of indicator	This indicator aims to capture the depth of processes and resources an organisation has implemented to help meet their targets on material ESG factors. Actively managing ESG performance requires organisations to adopt a range of potential processes and ensure adequate resources are provided. The specific processes and level of resources will depend on the context of the asset. In all cases, however, these processes and resources should be regularly assessed and adjusted according to their effectiveness in meeting material ESG targets for all real estate assets.

 (D) Other Specify: [Mandatory free text: small] 				[As above]			
O (E) We do not manage material ESG risks and opportunities post-investment							

Explanatory notes	
Purpose of indicator	This indicator aims to capture how an organisation uses the management of material ESG factors to create value during the holding period of an investment. It is considered good practice for investors and/or their third-party property managers to develop ESG action plans that can be updated according to ongoing performance to create value during the holding period of an investment.

	ESG risks and ESG opportunities should be re-assessed continuously to better understand the performance of the investment portfolio and to identify areas for continuous improvement. Doing this in a structural way allows the signatory to assess ESG performance within and amongst portfolios and to potentially assess the performance of other investment managers.							
Other resources	For further guidance, see An introduction to responsible investment: real estate. For more information, see the BII (formerly CDC Group) guidance on ESG action plans.

What proportion of your real estate assets has obtained a green or sustainable building certification?						
 O (A) All of our real estate assets have obtained a green or sustainable building certification O (B) A majority of our real estate assets have obtained a green or sustainable building certification 						
		-	n or sustainable building certification			

Explanatory notes	
Purpose of indicator	This indicator assesses the proportion of an organisation's real estate assets that have obtained a green or sustainable building certification to determine the quality of the assets invested in, providing benefits for the occupants, society and the environment. Building certifications and ratings give credibility to the sustainability performance of a building and serve as an additional layer of transparency and accountability to inform investors and occupiers of the ESG performance of an asset. It is considered good practice to obtain a green or sustainable building certification for all real estate assets held.
Additional reporting guidance	See GRESB building certification schemes for a list of design and/or construction green building certification schemes. GRESB definition for 'Green building rating standard': A rating system or certificate for real estate assets that uses a wide set of environmental criteria. Successful completion of the rating assessment typically results in the award of a certificate that records (a) the completion of the rating assessment process and (b) the level achieved.
Other resources	See Sustainable real estate investment: Implementing the Paris Climate agreement - An action framework for more information on sustainability in real estate investment. For further guidance, see GRESB's real estate reference guide. For more information on green building rating tools, see World Green Building Council – Rating tools.

□ (F) Other Specify:	(F) Other Specify: [Mandatory free text: small]			[As above]			
O (G) Our third-pa	arty property mana	ager(s) do not engage with tena	nts				

Explanatory notes							
Purpose of indicator	This indicator aims to capture an organisation's and/or third-party property manager's approach to engaging tenants on ESG issues, as tenants are the main stakeholder group contributing to the environmental and societal impacts of the building. It is considered good practice for an organisation and/or third-party property manager to engage with property occupiers on ESG issues for all buildings and/or properties. Consequently, organisations can better anticipate and respond to tenant needs when it comes to ESG issues and may be able to better understand the effectiveness of different ESG-related initiatives.						
Additional reporting guidance	The coverage for each answer option should be based on the number of buildings or properties. In this indicator, 'tenant' refers to a person or group that occupies a house, office, industrial estate or similar. In this indicator, 'targets' may describe changes in environmental or social performance and the relationship to the investment.

During the reporting year, how did you or the organisations operating on your behalf engage with the local community above and beyond what is required by relevant regulations for asset design, use and/or repurposing?							
[Voluntary free text: large]							

Explanatory notes	
Purpose of indicator	This indicator aims to understand the methods used by the signatory to respond to community needs and to improve place-based design and operation practices.
Additional reporting guidance	'Community engagement' covers engagements with stakeholders located outside, but often close to, properties; it generally includes members of the public, whether individuals or organised groups. Engagement can refer to communication, interaction and any relationships between your organisation and a stakeholder group. If you have dedicated community engagement programs, specify the objectives of these programs in the community and the outcomes they typically intend to deliver. Your description could cover how your organisation and/or your third-party property managers measure and monitor the impact of your community engagement programme, including whether your community engagements have led to significant changes and to what extent you and/or your third-party property managers.

During the reporti	During the reporting year, what responsible investment information was shared with potential buyers of real estate investments?							
 (A) Our firm's high-level commitment to responsible investment, e.g. that we are a PRI signatory (Dropdown list] (1) for all of our real estate investments (2) for a majority of our real estate investments (3) for a minority of our real estate investments 								
 (B) A description with, e.g. TCFD 	•	v and asset class standards our t	firm aligns	[As above]				
	 (C) Our firm's responsible investment policy (at minimum, a summary of key aspects and firm-specific approach) 			[As above]				
	 (D) Our firm's ESG risk assessment methodology (topics covered in-house and/or with external support) 			[As above]				
□ (E) The outcome of our latest ESG risk assessment of the property(s)			rty(s)	[As above]				
□ (F) Key ESG pe	□ (F) Key ESG performance data on the property(s) being sold			[As above]				
□ (G) Other Specify:	[Mandatory free	text: small]		[As above]				

O (H) No responsible investment information was shared with potential buyers of real estate investments during the reporting year

O (I) Not applicable; we had no sales process (or control over the sales process) during the reporting year

Explanatory notes							
Purpose of indicator	This indicator aims to capture whether the signatory includes ESG-related information in its asset sales process. It is considered good practice to disclose ESG-related information regarding real estate investments to potential buyers prior to a sale, increasing the completeness of information available to the buyer and demonstrating good stewardship on behalf of the seller. Providing evidence of good ESG practice to a potential buyer of an asset can give the buyer greater visibility of potential ESG risks and opportunities, enabling them to make a more informed decision about the asset and its value and avoid potential legal or reputational issues for the non-disclosure of material ESG factors.

Assessment							
	100 points for this indicator divided between lettered (5 lettered and coverage answer options.	0 points) and c	overage (50 points) answer options. The final score wi	II be based on the highest-scoring combination of			
Assessment criteria	50 points for the lettered answer options: 50 points for 4 or more selections from A–F; MUST include 1 or more selections from D–F. 33 points for 3 selections from A–F. 16 points for 1–2 selections from A–F. 0 points for G, H.	AND	 50 points for the coverage: Per answer selection A to F, each option will be worth the following proportion: 50/4 points for all (1). 25/4 points for a majority (2). 12/4 points for a minority (3). 	Further details: Selecting 'H' will result in 0/100 points for this indicator. Selecting 'I' means the indicator is scored as N/A. Signatories will not be penalised for this indicator.			

'Other' scored as	Selecting Other (G) will not be counted by the scoring criteria, provided answer options have been identified as capturing good practice.	
Multiplier	Moderate	

DISCLOSURE OF ESG PORTFOLIO INFORMATION [RE 21]

Indicator ID RE 21	Dependent on:	00 21	Sub-section	PRI Principle	Type of indicator		
	Gateway to:	N/A	Dislcosure of ESG portfolio information	6	CORE		
During the reporting year, how did you report on your targets on material ESG factors and related data to your investors?							
 (A) We reported through a publicly disclosed sustainability report (B) We reported in aggregate through formal reporting to investors (C) We reported at the property level through formal reporting to investors (D) We reported through a limited partners advisory committee (or equivalent) (E) We reported at digital or physical events or meetings with investors (F) We had a process in place to ensure that serious ESG incidents were reported (G) Other Specify: [Mandatory free text: small] (H) We did not report our targets on material ESG factors and related data to our investors during the reporting year 							

Explanatory notes	
Purpose of indicator	This indicator aims to understand a signatory's specific approach to the communication of targets on material ESG factors and related data to its real estate assets. It allows signatories to demonstrate how widely available they have made information on their responsible investment practices. It is considered good practice for signatories to disclose information about their investment activities to the public and investors annually or more frequently.
	Private market investments are less transparent than public investment markets. As a result, private market investment managers have an additional responsibility to be transparent to investors and proactively report ESG-related portfolio information. In addition, some jurisdictions are currently developing regulations requiring investment managers to report some ESG-related portfolio information to their clients.
Reference to other standards	For examples of an industry-led set of standardised ESG metrics, see GRESB and ESG Data Convergence Project.
